## DIRECTIONS TO CUSTOMERS

CANADIAN CUSTOMERS will please remember that shrubs, trees and vines are not admitted from the States at all seasons. They are admitted in Spring, commencing March 15, until May 15, and in the Fall, commencing September 26, until December 1. Postage to Canada, 12 cts. per lb.

## About Forwarding Plants by Parcel Post, Express or Freight

Parcels of 6 to 8 lbs. can often go to the second or third zone cheaper by Parcel Post. When our customers wish us to send in this way, we will do so and charge the postage to those who give good reference. Plants can be sent with better roots, as all the soil can be left on that is necessary, better packed, safer, quicker and usually cheaper, by express. The new rates of express companies are much lower than heretofore.

IF IN GOOD CONDITION WHEN RECEIVED, OUR RESPONSIBILITY CEASES; if not in good condition, complaint must be made at once. We cannot be held responsible for CULTURAL FAILURES.

Hardy shrubs, vines and Roses can be safely sent, when dormant, by freight. Unless the shipment is a large one, express is often better, insuring delivery without delay, and often cheaper, as freight is charged by the one hundred rate, even if the weight is very light. Plants with green tops, if sent by freight, and the weather is warm, if unduly delayed, are liable to decay; therefore, plants sent otherwise than by express are entirely at the risk of the purchaser.

> Holland Bulbs TULIPS, HYACINTHS, NARCISSI, CROCUS, IRIS, as well as LILIES and other PLANTS, SHRUBS, and TREES, are offered in the Autumn Supplement which is ready early in August.

MY PRICES include boxing, packing-except in the case of trees and shrubs (see instructions under that department) - and delivery to my nearest freight office, post office or express office.

I SHALL ALWAYS ENDEAVOR to give each customer full money value, whether the order is large or small, and in all cases where the customers feel that they have reason to complain, I shall thank them to inform me of it. If the fault lies with me, I shall be glad to make matters right.

IT MUST BE DISTINCTLY UNDERSTOOD by the purchaser of these goods that, while I use my utmost care to have all plants of strong and healthy growth, and true to name, I will not, in any way, be responsible for the failure of any, and if they can not be accepted on these terms, they must be returned within five days. So much depends upon the care such plants have, and the season following the planting, that I feel that my responsibility must end when the plants have reached the purchaser in good, healthy condition. Thousands of plants die each year for want of proper setting and care until established. A little extra pains in preparing the soil, shading and watering the plants until the roots get established, is worth all it costs.

REMITTANCE may be sent at my risk by post office order on Charlotte, Vermont, by draft, check or registered letter. Half a dozen plants will be furnished at dozen rates. Where no hundred rate is given, fifty plants will be furnished at the price of four dozen, and one hundred at the price of eight dozen. To those who wish to purchase in large quantities, lower prices will be given, if my stock is sufficient.

## Horsford's Hardy Plants LILY BULBS, FERNS TREES, SHRUBS, ETC.

THIS LIST CANCELS ALL PREVIOUS OFFERS

 N presenting my 29th Annual List, it seems proper to call attention to some facts of interest to old and new customers alike. While I specialize in Hardy Lilies I have increased my stock of Hardy Perennials in all of the standard kinds and have added some newer ones. The Alleghany Hollyhocks and the English Bedding Violas are novelties of proven merit. My list of Campanula, Delphinium and Poppies include the best forms, and there are many of the named Dianthus offered, as well as such old favorites as the Garden Heliotrope and its red form, Vaieriana Rubra. I am glad to announce also, that I can again send out plants of the true double Gypsophila Paniculata; not seedlings, but plants grown from the original Dutch strain. I have reduced my price on the very popular novelty, Lilium Regale, to the point where it can be bought in quantity and be found in every garden.
My nursery is located in the beautiful Champlain Valley, twelve miles south of Burlington, Vt., on the Rutland Railroad. There is not much of interest in the nursery until the first week in June, when the German Irises are in bloom, with other early-flowering perennials, like Poppies, Lupines, Dainthus, etc.; then, later in the month, Peonies. Early-blooming Lilies and Japan Iris are in flower in July and are followed by Phlox and later-flowering perennials. In August the later Lilies, like Auratum and Henryi can be seen and, in early September, the late-flowering Speciosums.

I shall be glad to give desired information regarding hardiness of plants for certain locations, or selections of plants or shrubs and the time of planting, providing the questions are of such a character that they can be briefly answered.

I realize my success can only be permanent when orders prove entirely satisfactory to customers, and I aim to give prompt and careful attention to every order, no matter how small or how large, and to do all in my power to merit a continuance of their kind patronage.

Clematis Recta (See p. 8)

## HARDY PERENNIALS

ACHILLEA. Yarrow; Milfoil.
A. Millefolium, var. roseum. This handsome form of the common Yarrow has rose-colored or almost crimson flowers in August. It is an attractive plant when in bloom and comes when the flower crop begins to wane. It is propagated by division. 20 cts. each, $\$ 2.00$ doz.
A.-, Pink Form. This is quite distinct from the others, having paler pink flowers. 25 cts. each.
A. Ptarmica, var. The Pearl. A fine garden plant with full double white flowers, fine for cutting. 20 cts. each, $\$ 2$ doz.
A. filipendulina (A. Eupatorium). This fine plant from the shores of the Caspian Sea grows 2 to 3 feet high; flowers bright yellow, in flat heads, and with lace-like foliage. June to September. Nice to plant among shrubbery, evergreens, or for back border. 25 cts. each.
A. tomentosa. A very charming yellowflowered plant blooming in June. It will do in the rockery or in any part of the border. While it grows naturally on dry, rocky soil, it has done finely on lower and more moist levels. 20 cts each, $\$ 2$. doz.

ACONITUM. Monkshood. An interesting group of plants, but the roots are very poisonous when eaten and are dangerous when planted near vegetables or where children are liable to get them. They are easily grown in common garden soil and do well in shade of deciduous trees.
A. Napellus. Probably the best and most reliable Monkshood, flowering the last of June. Its flowers are blue or nearly white. 35 cts. each.
A.-, var. bicolor. Blue-and-white, attractive flowers and is easily grown. 35c each.
A. Storkianum. A very striking form on account of its dark, navy-blue flowers. 35 cts. each.
ACORUS Calamus. Sweet Flag. This bog plant will grow in ordinary garden soil. The long, light green leaves are pretty, but the plant is principally cultivated for its aromatic root. 10 cts. each, $\$ 1$ doz.
ACT/ÆA alba. White Baneberry. Grows about 2 feet high, bearing short heads of white flowers in spring and white berries in autumn. Native of rich woods and useful to plant in shady corners. 20 cts. each, $\$ 2.00$ doz.
A. rubra. Red Baneberry. Grows 1 to 2 feet high, with short spikes of small, white flowers; red berries in late summer. Useful for rockery and wild garden. 20 cts. each, $\$ 2.00$ doz.
ADONIS vernalis. Pheasant's Eye. One of the most attractive early-blooming plants. Flowers bright yellow, 2 to 3 inches wide. It forms tufts 8 to 12 inches high, and has finely divided and attractive foliage. Likes a light, sandy soil, where it should be left undisturbed when once established. Particularly fine for growing in front of shrubbery or higher-growing perennials, where it will increase rapidly. 35 cts. each.
AJUGA genevensis. Flowers bright blue, in long dense spikes which nearly hide the foliage. Useful in the shade of a rockery. 25 cts. each, $\$ 2.50$ doz.
ALTHÆA rosea. Single Hollyhocks. This distinctive old-fashioned flower is more permanent than the double kinds and of late it is much more of a favorite. It is fine among shrubbery and quite permanent when once established.
Althæa. Single mixed (Hollyhocks)15 cts. each, $\$ 1.30$ doz., $\$ 10$ per 100.
Althæa. Single Maroon, 15 cts. each, $\$ 1.30$ doz., \$10 per 100.
Althæa. Single Pink. 15 cts each, $\$ 1.30$ doz. Althæa. Single Sulphur-yellow, 20 cts. each, $\$ 2.00$ doz.
Althæa. Single Red. 15 cts. each, $\$ 1.50$ doz.
Althæa. Double white, 15 cts. each, $\$ 1.50$ per doz., $\$ 10.00$ per 100 .
Althæa. Double, yellow, 20 cts. each, $\$ 2.00$ per doz.
Althæa. Double, pink, 20 cts. each, $\$ 2.00$ per doz.
Althæa. "Alleghany." Mammoth flowers, wonderfully formed of loosely arranged fringed petals which look as if made from the finest china silk. The colors vary from the pale stshrimp-pink to deepest red. The plants are of strong growth, sending up spikes 6 to 7 feet high. 20 cts . each, $\$ 2.00$ doz. $\$ 15.00$ per 100 .
ALYSSUM saxatile, var. compactum. Madwort. A handsome, yellow-flowered perennial which comes in May. It is useful for wall gardens or in any place where early spring flowers are desired. It grows about a foot high. 20 cts. each, $\$ 2$ doz.
AMSONIA Tabernæmontana. A rather good perennial, with terminal bluish flowers in May; very permanent plant when once established. The foliage is good and the flower panicles attractive. 20 cts. each, $\$ 2.00$ per doz.

ANCHUSA Italica, Dropmore Variety. An interesting border plant 3 to 4 feet high, with pretty gentian-blue flowers in June. This form is a favorite with all who see it. 20 cts. each, $\$ 2.09$ per doz.
ANEMONE canadensis. (A. pennsylvanica). This white-flowered Anemone comes in June. It likes a rather heavy damp soil and soon spreads and forms good clumps. 10 cts. each, $\$ 1$ per doz.
A. nemorosa. Common Windflower; Wood Anemone. 10 cts. each, $\$ 1$ doz.
A. sylvestris. This is one of the best in moist, sandy soils. Bears good-sized, delicate white flowers on long stems, in latter part of May. It spreads a little from the root, forming good clumps or masses, but not so much as to become troublesome here. The flowering season may be extended by free cutting, to prevent its going to seed. 25 cts each.
ANEMONELLA thalictroides. A pretty white spring flower about the size of the wood anemones and usually found in partial shade. 10 cts. each, $\$ 1$ per doz.

Hollyhock "Alleghany"

Aquilegia Canadensis
ANTHEMIS tinctoria. Chamomile. This old flower is a very good and reliable garden plant which attains a height of about a foot. It is somewhat spreading and bears many handsome daisy-shaped yel-low flowers which are fine for cutting. It may be grown in any good garden soil and is not difficult to manage. 20 cts. each, $\$ 2$ per doz.
A.-, var. Kelwayi. Has flowers of various shades; otherwise it is much like the type. 20 cts. each.
ANTHERICUM Liliago. St. Bernard's Lily. Attains a height of 15 inches. Flowers pure white in May and June. 20 cts. each, $\$ 2$ per doz.
AQUILEGIA. Columbine. Alpine plants of many colors and sizes. A few are inclined to be biennial in cultivation; others are longer lived, while still others are permanent perennials. They bear a profusion of blooms on long, slender stems and present a most graceful aspect.
A. alpina. Grows about a foot high, having blue or sometimes paler flowers. 20 cts. each, $\$ 2.00$ per doz.
A. Bicolor. Blue and white flowers. 20 cts. $\$ 2.00$ per doz.
A. cærulea. This blue-and-white Rocky Mountain flower is one of the most charming of the Columbines. While not as long lived as some, it may be made to last longer by not allowing the seeds to mature. The flowers are borne on slender stems, often 2 feet or more high, are exceptionally graceful and are useful in cutting. It is a lovely flower for any garden. 20c each.
A. canadensis. American Wild Columbine; Honeysuckle. It flowers early, next after the Oxysepala, and few of our wild flowers are better suited to the rock garden than this. Flowers an inch or more long, red and yellow are borne in abundance. Very graceful and attractive plant. It seems to do well in any garden soil both in sun and shade. 15 cts. each, $\$ 1.50$ per doz.
Aquilegia chrysantha. Golden-spurred Columbine. A hardy Pocky Mountain plant of great worth in the flower border. It is vigorous in habit and a long time in bloom. When given sufficient room it is rather bushy in habit and attains 2 feet and more in height. The flowers are on long stems and keep well in water. Blooms in summer. 20 cts. each, $\$ 2$ per doz.
A. flabellata. A fine Japanese species with pale or nearly white flowers. Hardy. 20 cts. each, $\$ 2$ per doz.
A. oxysepala. This native of Siberia is the first to bloom, and is quite hardy and more permanent than some. Flowers blue with some white and yellow tints. 25 c ea.
A. sibirica. Flowers in May; mostly purple; useful for cutting. 20 cts . each.
A. vulgaris. A reliable old variety that has escaped from gardens in some localities and grows wild; hardy and of easy culture. One of the best and has many colors. May and June. 15 cts. each, $\$ 1.50$ per doz.
A.-, var. alba. This variety has white flowers and is very handsome and useful for cutting. 20 cts. each.
A. New Long-spurred hybrids. A magnificent strain in many new and beautiful shades. 25 cts. each, $\$ 2.50$ per doz.

ARABIS albida. Low, pubescent, earlyflowering plant. Fragrant white flowers in loose racemes in early spring. A good plant for the rockery, for the border, or for covering steep banks where it will spread and form a veritable carpet. 20 cts. each, $\$ 2.00$ per doz.

ARMERIA alpina. Alpine Thrift. Flowers are pale pink or rose, 8 or 10 inches high. 20 cts. each, $\$ 2.00$ per doz.
A. maritima. Low growing, with pale pink or rose flowers. 20 c . each, $\$ 2$ doz.
A. plantaginea. Sea Pink. Taller than either of the preceding. Flowers on long, naked stems, pale pink or nearly white, of easy culture and a good garden plant. 20 cts. each, $\$ 2.00$ per doz.
ARISÆMA triphyllum. JACK-IN - THEPulpit; Indian Turnip. One of the interesting hardy bulbous plants; suited to shade or rockwork if moisture is given. It selects a rich, moist soil. May. 15 cts . each, $\$ 1.53$ per doz.
ASARUM canadense. Snakeroot; Ginger root. Only 3 to 5 inches high. Large, dark green, kidney shaped leaves. Flowers early, hidden among the leaves. Nice for shady corner or shaded rockwork. 15c. ea.
ASCLEPIAS tuberosa.
Swallowwort; Butterfly Weed. A very attractive plant when in flower. Grows about 18 inches high and in time forms good-sized clumps which are very showy when the mass of orange-yellow flowers appears. It is suited to sunny portions of rockwork or to any well-drained soil. 25 cts. each, $\$ 2.50$ per doz.
ASTERS. Michelmas Daisies; Perennial Asters. Late blooming plants which flower after the first frosts. They are fine in the hardy garden and prolong the flower season, giving much color after most of the hardy flowers are past. The blooms are borne in such profusion that at a distance the bush seems a solid mass of color.
A. Alpinus. A dwarf aster, only a few inches high. 20 cts. each, $\$ 2.00$ per doz.
A. lævis. Has handsome, hardy, permanent, sky-blue flowers in late September and early October. A showy plant and nice for cutting. 20 cts . each, $\$ 2$ per doz.
A. novæ-angliæ. New England Aster. A very hardy, strong, and beautiful species with stout stems 3 to 6 feet high and a profusion of large flower-heads with beautiful violet-purple flowers in large corymbs in September and October, One of the best Asters. Strong plants, 15 cts. each, $\$ 1.50$ per doz. $\$ 10.00$ per 100.
A.-, var. roseus. Has rose-colored flowers much like the type in height and size. 35 cts. each, $\$ 3.50$ per doz.
A. tataricus. This is the latest bloomer of the kinds I have grown. It spreads fast from the root and a few plants soon make a good colony. Flowers bluish purple. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$. per 100.
A., White Queen. Hardy; 2 or more feet high with an abundance of white flowers an inch wide. 25 cts. each.
ASTILBE japonica (Spiræa japonica). One to three feet high; white flowers in racemose panicles. 25 cts each.
BAPTISIA australis. This is a very permanent plant which, once established, lasts indefinitely. It has blue pea-like flowers and dark green foliage. A single plant will form a good-sized clump in time, sending up more shoots each year. The foliage is good the season through. 20 cts. each. $\$ 2.00$ per doz.

Boltonia latisquama (See page 6)

Campanula persicifolia alba
BELLIS perennis. English Daisy. Very pretty little plant 3 or 4 inches high, which bears handsome, double, daisy-like flowers of various shades. Nice for marking beds. 15 cts. each, $\$ 1.50$ per doz.
BOCCONIA cordata. Plumed Poppy. In rich soil often grows 8 feet high, bearing large terminal, buff-colored flowers in summer, followed by the almost equally ornamental fruit. Nice for planting among shrubs. It is a persistent plant and rather difficult to eradicate when once established. 15 cts . each, $\$ 1.50$ per doz.
BOLTONIA asteroides. Useful in late summer and autumn when flowers begin to be scarce. The flowers are pure, white and borne in large masses 8 feet high, in rich soil. 15 cts. each, $\$ 1.50$ doz., $\$ 10$ per 100 .
B. latisquama. Flowers rosy pink to lavender in large heads. A fine aster-like plant which blooms even later than the preceding and is fine for cutting. This plant has stood the first severe frosts without apparent injury. 15 cts . each, $\$ 1.50$ per doz., $\$ 10.00$ per 100 .
CALLIRHOE involucrata. Poppy Mallow. A trailing perennial of the Malva
family, bearing a profusion of large, violet crimson flowers. Hardy; of easy culture. Summer. 15 cts. each, $\$ 1.50$ doz.
CaLTHA palustris. Marsh Marigold; Cowslips. A fine yellow-flowered, early plant for wet ground. In a natural situation it makes a lavish show in early spring. It forces well in pots. 12c. each, $\$ 1.20$ doz.
CAMPANULA. Bellflower. A remarkable genus for the hardy garden. It comprises many of the choicest gems our gardens afford. Some are especially suited to the rockery while others are better in the border. Most of those I offer are perennial.
C. alliariæfolia. One to 2 feet, branching at the top; leaves heart shaped; flowers white, about 2 inches long, borne in racemes. Native to Asia Minor. 20 cts. each, $\$ 2.00$ per doz.
C. carpatica. A charming tufted plant 6 to 8 inches high with handsome blue flowers an inch wide. Summer. 20 cts. each, $\$ 2.00$ per doz.
C. - var. alba. The white form of this plant is very attractive. 20 cts . each, \$2 doz.
C. glomerata. Stems 1 to 2 feet high; blue flowers clustered at summit. 20 cts . each, $\$ 2.00$ per doz.
C. latiloba (C. grandis). Twelve to 18 inches high; flowers blue and often 2 inches wide. 15 cts . each, $\$ 1.50$ per doz.
Campanula Medium. Canterbury Bells. The most popular biennial of the garden flowers. Of various shades-blue, purple, rose or pink, - white and sometimes double. June.
We can offer the following in separate colors.
Campanula Medium in white, pink and and blue. 20 cts. each, $\$ 2$. doz., $\$ 15$ a 100
Campanula Medium. Cup and Saucer Rose. 20 cts. each, $\$ 2.00$ per doz.
Campanula Medium. Cup and Saucer, Purple. 15 cts. each, $\$ 1.50 \mathrm{doz}, \$ 10$ a 100 .
Campanula Medium. Double White. 20 cts. each, $\$ 2.00$ per doz.
Campanula Medium Mixed. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100 .
C. persicifolia, var. alba. One of the favorites of this genus. Flowers white, very showy, and on good stems for cutting. 15 cts. each, $\$ 1.50$ per doz.
C.-, var. cærulea. 15 cts. each, $\$ 1.50$ doz.
C. punctata, var. Marian Gehring. We have many good reports from this plant. It seems to give best results when planted in a mass of half a dozen or more. A new perennial Canterbury Bell. Grows from

2 to 3 feet high, one to many stems from a single plant. Lower leaves round, heartshaped, strongly toothed, 4 to 6 inches wide, on petioles 4 to 7 inches long. It spreads from subterranean stolons and does not bear seed. A single plant will form a strong clump 2 feet or more in diameter, and the flowers are produced in loose racemes in great profusion. The color of the flowers is pale lavender, and they are nearly as large as those of the Canterbury Bell, though more graceful. The flowering season extends over a period of from four to six weeks, after which there is a more straggling succession of bloom until frost. This form originated in the garden of Dr. J. G. Gehring of Bethel, Me., and was found growing near a colony of Campanula punctata, near which one solitary specimen of a Canterbury Bell (Campanula Medium) was in bloom. Since it produces no seed, and has some of the characteristics of both the above species, it is reasonable to suppose it a natural hybrid between the two plants. I offer plants at 30 cts. each, $\$ 3$ per doz.
C. rhomboidalis. Somewhat like the little Harebell and grows about as high. Flowers blue. Nice for the rockery. 20 cts. each, $\$ 2.00$ per doz.
C. rotundifolia. Harebell; Blue Bells of Scotland. Attains a height of 6 to 12 ins., forming dense tufts. Useful for the rock garden; will do well in partial shade or in open border. 20c each, $\$ 2$ per doz.
CENTAUREA dealbata. This plant from Asia Minor has reddish flowers and grows from 8 to 24 inches high. The seeds attract the birds so that we have at times to cover the whole plant in order to save any seed. 20c each.
C. Montana. A very pleasing perennial form of the well known Cornflower or Bachelor's Button. It commences to bloom early and is quite continuous. The large blue flowers are frequently three inches across and are borne on heavy stems, lasting well when cut. Fine for bedding, vases, baskets, and pots and for borders and edgings. 20 cts . each, $\$ 2.00$ per doz.
C. montana alba. The white form of the preceding. 20 cts. each, $\$ 2.00$ per doz.
C. macrocephala. A very hardy species from the Caucasus. Numerous large decurrent leaves and large yellow flowerheads in July. 20c. each, \$2. per doz.

Campanula punctata, Marian, Gehring (See p. 6)
CERASTIUM tomentosum. A low, creeping plant with the upper surface of the leaves light in color and woolly; it bears a profusion of pretty white flowers. Much used for edging, also to plant in crevices of walls or rockwork, where it keeps up a succession of bloom all summer. 20 cts. each, $\$ 2.00$ per doz.
CHRYSANTHEMUM coccineum (Pyrethrum hybridum). Very charming daisylike flowers on long stems; fine for cutting. June. 20 cts. each, $\$ 2.00$ per doz.
C. maximum. Shasta Daisy. Flowers like the common white daisy but twice as large. Handsome when in flower, and the flowers have good stems for cutting. Hardy and easily grown in full sun. Summer. 20 cts. each, $\$ 2.00$ per doz.
C. Alaska Daisy. This is the largest of the Daisies we have tried here and the flowers are very fine. They are produced in great profusion and the season is a long one. 25 cts. each, $\$ 2.50$ per doz.

CIMICIFUGA racemosa. Blagk Snakeroot; Black Cohosh; Bugbane. Grows 4 to 8 feet high, with white flowers in feathery drooping racemes. A stately plant, suited to moist and shaded situations, though it will do fairly well in full sun. July and August. 20 cts. each, $\$ 2$ per doz.
CLEMATIS integrifolia. This is not commonly known. It is a very pretty plant with deep blue nodding flowers. 25c. each.
C. recta. A very attractive bush clematis 2 to 3 feet high, with large clusters of pretty white flowers from June to August. It is a very permanent plant and should last years when once established. A very desirable variety. 20c. each, $\$ 2$ per doz.
COREOPSIS lanceolata. Of the best of the garden plants, nice for cutting, and has very pretty yellow flowers. Should be in every collection. Hardy, easily grown, and a favorite with all who know it. 15 cts. each, $\$ 1.50$ per doz.

Hemerocallis flava (p. 12)
C. verticillata. Very floriferous, with yellow flowers a little smaller and later than Lanceolata. 15 cts. each, $\$ 1.50$ per doz.
CORONILLA varia. Crown Vetch. A plant belonging to the natural order of Leguminosæ, with pink-and-white flowers 12 cts. each, $\$ 1.20$ per doz.
CONVALLARIA majalis. Lily-of-TheValley. A plant of the lily family, too well known to need detailed description. It likes a little shade and moisture, and does finely under shaded walls. Spring. Clumps 15c. each, $\$ 1.50$ doz,. $\$ 10$ per 100.
DELPHINIUM. Larkspur. Thrives to a certain extent in any good garden soil with proper care, but, for the best results, special care should be given. Work the soil deep, with plenty of finely composted manure mixed in. An old favorite that supplies the blue needed to complete the color scheme of the garden.
D. Belladonna. Medium in height, with soft, sky-blue flowers. A very pleasing tint for a Larkspur. 15c. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
D. elatum. Bee Larkspur. Tall, if not the tallest growing species. Flowers very fine, dark to pale blue. 20c. each, $\$ 2$ doz.
D. formosum, var. cœlestinum. This form has large, pale blue flowers, borne profusely in fine shapes. 20c. each, $\$ 2$ doz.
D. grandiflorum (D. Chinense). Siberian Larkspur. One of the lower-growing kinds having variously tinted flowers, from deep blue to white, all very delicately shaded and of good size. One of the best. July and August. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
D.-, var. album. 15 cts. each, $\$ 1.50$ per doz. $\$ 10$ per 100 .
D. hybridum, Mixed. 15 cts. each, $\$ 1.50$ per doz. $\$ 10$ per 100 .
D.-, Seedling from Herman Sterger. These seedlings are not now like the original stock. They are stronger, taller, and vary in color from nearly white to dark blue. 15 cts. each, $\$ 1.50$ per doz.
D., Kelway's Selection. This is one of the best flowers; variable and very showy. 20 cts. each, $\$ 2.00$ per doz.
D., King of the Blues. This is a medium sized form, with very deep blue flowers, and seems to hold to color better than most Larkspurs. I found it growing in the nursery and it is probably a chance hybrid. 25 cts. each, $\$ 2.50$ per doz.
D. Maackianum. A Siberian species of medium height, with blue flowers in loose panicles. A very graceful variety that is most effective. 15 c . each, $\$ 1.50$ per doz.
DIANTHUS barbatus. Sweet William. An old-fashioned garden flower too well known to require detailed description. 15 c . each, $\$ 1.50$ per doz. $\$ 10$ per 100.
D.- White. 15 cts. each, $\$ 1.50$ per doz, $\$ 10$ per 100 .
D.-, Pink Beauty. 20 cts. each, $\$ 2.00$ per doz.
D.-, Newport Pink. 20 cts. each, $\$ 2$ doz.

## Hardy Garden Pinks

The following are clove-scented and flower in great profusion during May and June. Fine for edge of the hardy border and also for cutting.
DIANTHUS cæsius. Cheddar or Cliff Pink. Flowers delicate rose; fragrant. Summer. 15 cts. each, $\$ 1.50$ per doz.

Hardy Garden Pinks
D. cruentus. $(D$. atrococcineus). Hasblood-scarlet flowers; very striking in the garden or when cut; small, but numerous. Eastern Europe. June 15 cents each, $\$ 1.50$ doz.
D. deltoides. Maiden Pink. Plant bout 6 inches high; flowers rose in summer. One of the prettiest border pinks. 15c. each.
D.-alba. 20 cts. each.
D. superbus. Flowers ers pale pink or white. A handsome single pink. 15 c each, $\$ 1.50$ per doz., \$10.0才 per 100.
D. plumarius. Pheasant's-Eye Pink. Stems about a foot high

Dictamnus from a tufted root. Flowers fragrant in many shades. Australia and Siberia. Very hardy. 15 cts. each, $\$ 1.50$ per doz.
D. Her Majesty. A fine, double, white, hardy, fragrant Pink. Summer. 20 cts. each, $\$ 2.00$ per doz.
D.- Rose de Mai. A brilliant double rose form. 20 cts . each.
D. var. Grass or Clove Pink. Vermont Pink. Old, double, sweet scented Pink; a favorite with all who know it. It is very permanent when established, and the double, rose-pink flowers are borne on rather short stems. One of the most enticing plants for the old-time garden. 20 cts. each, $\$ 2.00$ per doz.
D., White Reserve. One of the best hardy Garden Pinks, being an everblooming, pure white. 20 cts . each, $\$ 2.00$ per doz.
DICTAMNUS ruber, var. Dahuricus. Fraxinella; Gas-Plant. It is a goodsized, hardy perennial of much worth, from Eastern Europe. Its pale purple flowers are much better and more numerous after it has become well established. Too much should not be expected of this plant the first year after setting. It
is easy of culture, but a dry soil suits it best. Fine when well established. May and June. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
dicentra canadensis. Squirrel Corn. A rather nice, little, early-flowering bulbous plant, native to rich woods in shade, and useful for shady parts of the wild garden. It wants rich, black soil that is not too dry. Flowers white, tipped with rose, and finely cut; foliage delicate. This and $D$. Cucullaria both die down to the bulb in early summer. 12c. each, $\$ 1$ doz.
D. Cucullaria. Dutchman's Breeches. Bears a profusion of quaint white flowers in long racemes. 15 cts . each.
D. eximia. Handsome, reddish purple flowers and delicate foliage. Plant about 1 foot high. May to August. 30c. each.
D. spectabilis. Bleeding Heart; Seal Flower. One of the best old-fashioned garden plants. Hardy in every sense; fine for the border or margins of shrubbery, being quite distinct. May and June. 50 cts. each, $\$ 5$ per doz.
DIGITALIS. Foxglove. An interesting genus of plants whose culture is very simple, and will keep up a continuous succession of bloom all summer.
D. ambigua. (D. grandiflora). Has yellowish flowers and is quite pretty. It is a perennial, hardy and of easy culture. Middle of June. 20c. each, $\$ 2$ per doz.
D. lanata. Woolly Foxglove. A biennial, 3 feet. For best effect, should be massed. Its compound racemes of white and purplish flowers have an orchidaceous appearance. Eastern Europe. Summer. 20 cts. each.
Digitalis purpurea, var. gloxiniæflora. Has a great variety of colors, but in growing them separately I have had much difficulty to keep the colors separate. A tall, majestic plant, bearing long spikes of tubular flowers most beautifully spotted and marked like a gloxinia. It is very impressive when grown in mass. My strain is one of the very best. Good, strong clumps of this charming flower. Blooms in June. 20 cts. each, $\$ 2$ per doz.
D.-, var. alba. 20 cts. each.
D.-, var. Rose or Pink. 20 cts . each.
D. sibirica. Siberian Foxglove. A permanent kind with small, creamy colored flowers, borne in splendid, erect spikes, in great profusion. 20 cts. each, $\$ 2$ doz.

Echinops Ritro
DRACOCEPHALUM grandiflorum. (D. Altaiense). Dragon's Head. Siberian; 6 to 9 inches high, bearing handsome spikes of dainty blue, odd-shaped flowers about an inch long. Blooms in June and July and is a valuable addition to the garden blues. 20 cts. each, $\$ 2$ per doz.
echinops Ritro. Globe Thistle. This is the best species of this genus for cultivation. The dark blue, globular heads are very showy and useful for cutting. 20 cts. each, $\$ 2$. per doz.
ERIGERON glaucus. Fleabane. Comes from western North America. It is a fine, handsome perennial, apparently quite hardy, and bears plenty of good-sized heads of flowers, color light lilac, with yellow daisy-like center. Fine for cutting. 20 cts. each, $\$ 2$ per doz.
ERYNGIUM amethystinum. Sea Holly. Has heads of handsome amethyst-blue flowers. It is inclined to spread from seed and therefore should not be allowed to scatter its seeds. This is guarded against by cutting back after blooming. 15 cts . each, $\$ 1.50$ per doz.

Gypsophila Paniculata (Double Form)

## EUPATORIUM urticæfolium. WHITE

 Snakeroot. Three to 4 feet high, with good-sized heads of white flowers; does well in shade. 20c. each, $\$ 2$ per doz.FUNKIA. Plantain Lily; Day Lily. A genus of hardy, herbaceous perennials, with good foliage and often handsome flowers. Well suited to decorate the lawn or for planting in the borders of shrubbery or in rockwork. Before planting, mix in a supply of manure to a good depth.
F. lancifolia. A Japanese plant, with pale lilac flowers and lance-shaped leaves. Makes a very pretty show and is a most desirable addition to any planting. August. 20 cts. each, $\$ 2$ per doz.
F. lancifolia, var. variegata. This has crinkled foliage, variegated with white; flowers purplish lilac, a little paler than Thomas Hogg. 20c. each, \$2 per doz.
F. Sieboldiana. Rather low-growing with thick, bluish green foliage and pale lilac flowers. Very distinct form. 25 cts. each. $\$ 2.50$ per doz.
F. subcordata. White Plantain Lily. Blooms late in autumn, and is valuable on this account. 25 cts . each.
GAILLARDIA aristata ( $G$. grandiflora). Blanket Flower. A fine hardy plant admired by all. The daisy-shaped flow-
ers are red and yellow inside, of good size, and on long stems. In bloom longer than most plants and provides a gorgeous display of color. 20 cts. each, $\$ 2$ per doz.
GENTIANA Andrewsii. Closed or Bottle Gentian. Stems 8 to 15 inches high; flowers purplish blue, in August and September. 25 cts. each.
GERANIUM. Cranesbill.
G. Ibericum, var. platypetalum. Large and branching; of variable colors in June. 20 cts. each, $\$ 2$ per doz.
GYPSOFHIIA paniculata. Baby's Breath. A native of Europe. Has much to recommend it.Its flowers, produced during the summer, are very numerous, so much so that to a casual observer they seem almost inseparable. They are nearly white, borne in panicles, and give a very charming effect, either in the border or when used in boquets. It is an airy, graceful plant that grows in any good garden soil and is sure to be prized by all who try it. Its graceful, feathery foliage is very effective when used in boquet work with other flowers. 20c. each, $\$ 2$ doz.
G.-, var. fl.-pl. The double form of Baby's Breath. A fine new form with clusters of white flowers like tiny roses and the same gauzy foliage as the type. 50 cts . each.
HELENIUM autumnale. Sneezeweed. This handsome native perennial attains a height of 3 to 5 feet. It branches at the top and bears many large yellow flowers in autumn. 20 cts. each, $\$ 2$ per doz.
H.-, var. rubrum. Bright terra cotta red flowers. 20 cts. each, $\$ 2$ per doz.
H. Hoopesii. Charming yellow flowers, fine for cutting. Hardy and interesting. Spreads from root division, Flowers about June. 20 cts. each. $\$ 2$ per doz.
HELIANTHUS lætiflorus. This plant is much shorter than Maximilianii, and its flowers are a brighter yellow. It is early, compared to most species. It soon spreads to good-sized clumps; flowers very handsome and borne in great profusion, Summer. 15 cts. each, $\$ 1.50$ per doz.
H. mollis. Grows about 4 feet high. Flowers 3 inches wide, yellow, coming in August. 20 cts. each, $\$ 2$ per doz.
H. orgyalis. (H. salicifolius). Graceful Sunflowfr. One of the most valuable perennial Sunflowers. Attains a height of 6 to 10 feet in good soil, and soon forms large clumps. Its narrow, drooping foliage gives a mass of it a very attractive appearance most of the summer, and when finally the large handsome, yellow,

Hemerocallis fulva, var. Kwanso
flowers appear in great profusion, just before frost and endure after some of the first hard freezings, we have to acknowledge it to be one of the finest of its class in cultivation. Late autumn. 20c. each.
HELIOPSIS lævis, var. Pitcheriana, is a better plant than $H$. lrevis; not so tall, very floriferous and the flowers are deeper yellow. 20 cts. each.
HELONIAS bullata. Swamp Pink. Is found growing in dense shade and will grow in sun. It is one of the best bog plants. Beautiful pink flowers. 20 cts. each, $\$ 2$ per doz.
HEMEROCALLIS Dumortieri. Day Lily. This form has brownish orange-colored flowers which are very attractive in June. Grows about 18 inches high with an abundance of flowers which are fine for cutting. Japan and Siberia. 15c. each, $\$ 1.50$ doz.
H. flava. Lemon Day Lily. Fragrant yellow flowers in June. Grows 2 feet high with flowers on long stems for cutting. Siberia and Japan. 20c. each. $\$ 2$ per doz.
H. fulva. Orange Day Lily. This old-fashioned flower is one of the hardiest. It will do in full sun or in the shade of deciduous trees, and is not particular as to soil if not too wet. 15 cts. each, $\$ 1.50$ per doz. \$10 per 100 .
H.-, var. Kwanso. A form of the Orange Lily with double reddish flowers. It is an interesting plant both for cutting and for the border. Will do well under the same conditions as the type. 15 cts. each, $\$ 1.50$ per doz.
H. minor. This plant resembles a small form of Dumortieri and the smaller flowers are very attractive. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100 .
H. Middendorfii. A profuse bloomer over a long season. Flowers a deep golden yellow, three to five in a terminal head. Two to 3 feet high. 20 cts. each, $\$ 2$ per doz.
H. Thunbergii. This plant is much like the Lemon Lily except that it is taller and flowers after the earlier one has bloomed, or in August and September. It makes a good companion to the first, as it prolongs the season so much. It is easily grown in any good garden soil. 20 cts. each, $\$ 2$ per doz.
hepatica acutiloba. Liverleaf. The variously tinted flowers appear as soon as the snow is off the ground. 15 cts . each $\$ 1.50$ per doz.
H. triloba. Resembles the preceding closely, but has round-lobed leaves. It flowers very early and is nice to plant in front of shrubbery. 15c. each, $\$ 1.50$ doz.
HESPERIS matronalis. Rocket; Dame's Rocket. Two to 3 feet high; various flowered; sweet scented at night. South Europe and Asia. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
HEUCHERA sanguinea. Alum Root; Coral Bells; Crimson Bells. One of the best plants for the hardy border, keeping up a succession of bloom during July and August. Its delicate spikes or coralred bells are most charming, especially in a large bed or a mass. Nice for table or other decoration. 20 cts . each.
Hibiscus, Moscheutos. Marsh Mallow. This is a most attractive member of the Hollyhock family, bearing flowers often 6 inches wide and of various colors. Fine

## I, Laevigata (I. Kaempferi)

for bogs, though quite at home in good garden soil, Summer. 25c each, $\$ 2$ doz. H. oculiroseus. Crimson Eye. White, with crimson center. Very striking and has been widely advertised. It is commonly called Hibiscus Crimson Eye. 25 cts. each, $\$ 2$ per doz.
HOLLYHOCK. See Althaea.
IBERIS Tenoreana. Candytuft. Has an abundance of almost white flowers which last over a long period. Fine for massing and exceptionally good as a cut-flower. No garden should be without it. 20c each

## IRIS (Flag)

This is a grand family with many varieties. The flowers are among the most glorious in the hardy garden, and, by a proper selection, they may be had in bloom several weeks.
IRIS Cengialti. This species attains a height of about 6 inches, with numerous goodsized lilac flowers, and not only has the habit of blooming profusely in summer, but in late autumn a few plants usually flower. A hardy kind, much like the
lower forms of Germanica. 15 cts. each, $\$ 1.20$ per doz.
I. cristata. Crested Iris. Comes from North Carolina, and has handsome light blue flowers, with short, thick green foliage. One of the best dwarf kinds. It soon spreads so as to form good-sized clumps, and seems entirely hardy. May. 20 cts. each, $\$ 2$ per doz.
I. florentina alba. Orris Root. Fine early Iris; white, tinged with lavender. 15 cts. each, $\$ 1.50$ per doz.
IRIS germanica. German Iris; Flower-de-Luce. The great Bearded Iris.
Black Prince. Early; large flowers and one of the darkest purples. 20 cts. each, $\$ 2$ doz.
Iris flavescens, or Canary Bird. One of the best; conspicuous from a long distance when planted in a mass. Uprights soft, creamy yellow, falls paler cream color, with striped base. A most striking and valuable variety. Last of May. 20c each.
Edina. Low; uprights pale blue, falls blue and striped above. 20 cts . each.

Hepatica Triloba (p. 12)
Lady Stanhope. A tall, bold Iris, with exquisite lavender flowers; falls a little darker than the uprights. Flowers large, on stalks often 3 feet high. 15 cts . each, $\$ 1.50$ per doz.
Madame Chereau. Tall with high standards; white with blue margins. 15 cts. each, $\$ 1.50$ per doz.
Mrs. Woodhouse. Pale coppery yellow flowers; very attractive. 15 c each, $\$ 1.50$ per doz.
Her Majesty. Fine, with reddish purple flowers, 15 cts. each, $\$ 1.50$ per doz.
Penelope. Low form with nearly white flowers, 15 cts. each, $\$ 1.50$ per doz.
Plumeri. Flowers deep, dark copper. 15 cts. each, $\$ 1.50$ per doz.
Queen of May. A choice kind with mauvepurple flowers, somewhat resembling Her Majesty, though distinct from that variety. 20 cts. each, $\$ 2$ per doz.
Princess Louise. This new Iris is a very charming form with rose-purple flowers. 25 cts. each, $\$ 2.50$ per doz.
Iris longipetala. A species from Oregon, with blue flowers. A very pretty and effective variety that should be largely planted. 15 cts. each.
I. pallida Dalmatica. Tall, with finest lavender flowers. One of the handsomest of all Irises and most majestic in appearance as it carries its very large flowers in clusters of 4 or 5 on long stems. 25 c . each.
I. Pseudacorus. Yellow Flag. This is a strong-growing sort, 2 to 3 feet high, with clusters of good-sized yellow flowers. While it will do well in any ordinary garden soil, it seems to like moisture, and thrives best among the wet margins of brooks, where it soon forms good, large clumps. This is one of the taller, rankgrowing kinds. 20c each, $\$ 2$ doz.
I. pumila. A very pretty dwarf species, fine for edging; lilacpurple. April. 15 cts. each, $\$ 1.50$ per doz.
I.-. Rose-purple. 15 cts . each, $\$ 1.50$ doz.
I.-, Hybrid. Purple flowers; early. 15 cts . each, $\$ 1.50$ per doz.
I.- Hybrid. Yellow; a very fine new Iris, with yellow flowers. 20 cts . each, $\$ 2$ doz.
Iris Sibirica. From Siberia. Perfectly hardy. A profusion of light blue flowers. June. 15 cts. each, $\$ 1.50$ per doz. Seeds 5 cts. per pkt.
I.-, var. White-flowered. Produces white flowers of great beauty. 15 cts. each, $\$ 1.50$ per doz.
I.-, var. Snow Queen. One of the best white Irises, and apparently as hardy as any of the Siberian Irises. 15 cts . each, $\$ 1.50$ per doz.
I.- , var. orientalis. One of the best hardy blue sorts. 15 c . each, $\$ 1.50$ per doz.
I. versicolor. Common Blue Flag. Is the common Blue Flag of our brooksides and wet meadows. It grows naturally in moist places, but will thrive in any good garden soil when in cultivation. One of the best bog varieties, giving much bright color in its season, and blooms profusely in long spikes. June. 15 cts. each, $\$ 1.50$ per doz.
I. lævigata (I. Kaempferi). Japan Iris. This is one of the most popular of all Irises when grown on the right kind of soil. It comes in after the more common kinds are past bloom, and gives a great variety of color. It prefers a rather heavy, moist soil and will stand considerable enrichment. A few named kinds, strong plants, 30 cts. each, $\$ 3$ per doz. Fine mixed, 20 cts. each, $\$ 2$ per doz.

Iris Germanica

## Special Offering of German Iris

Atropurpurea Grandiflora. Large, darkblue uprights and deep blue falls striped with white at base.
Camellia. Uprights white stained blue, falls creamy white with few purplish stripes. A fine light variety.
Duchess of Remour. Porcelain-blue and dark blue.
Iris Fragrans, or Storm King. White, with violet veins.
Gracchus. Beautiful and large, creamy yellow uprights, falls velvet-purple and yellow striped. A very strong and early form.
Honorable. Upright portion of the flower clear yellow; lower portions yellow with purple veins.
Germanica Neglecta. One of the tallest and earliest of the German type, producing large, blue flowers. A striking and handsome Iris.

Nimrod. Pale and dark purple.
Iris, Purple Blush. A showy form, with rosepurple striped flowers.
Queen of Gypsies. A little taller than the average; uprights light mulberry, falls velvety purple with white stripes. A strong form with ample stems.
Roi des Belges. Purple falls, lighter than the standards.

Stylosa. Tall; standards wbite, tinged blue; falls purple with white stripes. Flowers large.

Sylvia. Pale blue and purplish blue.
Velveteen. Pale yellow standards; dark, velvety purple falls.

Walter Scott. Standards coppery yellow; falls dark, velvety purple; strong growing.

Ten of any ten varieties of the above $\$ 4.00$. One hundred of any one variety $\$ 5.00$.

Those of you who have grown Lilies, and grown them well, know what great satisfaction there is in having a collection of this flower. It requires more attention in planting and caring for them than many of the garden plants, and should not be left without attention as many others are when once they are planted.

The majority of species are hardy when once well established, yet by experience we find that a little covering is good to protect from sudden changes in winter. In light soils this can be remedied by deep planting, but I have found that deep planting in heavy soils is not so well as a more shallow setting with good winter protection. When the bulbs are once frozen in for the winter and a long warm spell comes which thaws them out entirely, they are liable to injury. With a covering of hay, leaves or straw manure, an ordinary winter's thaw does not reach them.

Like most other plants, fall planting will give best results if the frost is not allowed to reach the bulbs the first winter; but, on the other hand, spring setting is safer when there is danger that frost will reach the bulbs. Lilies, like most other garden flowers here in the North, stand much more cold after being well established.

I find this bulb stands much more enrichment than has been supposed. Under Auratums, Speciosums, and Candidums I have had good success in putting a thin layer of sphagnum moss. I never set Auratums in the nursery without this sphagnum under them. It protects the bottoms of the bulbs from the enriched soil and seems to stimulate their growth. Sphagnum moss is used in packing our bulbs and can be used for this purpose.

Lilies, like the hollyhock and potato, are liable in certain wet seasons to blight. When once it gets hold, as with the potato blight, spraying with bordeaux does not seem to be of much benefit, but, when the spraying is done before the blight comes, it is likely to prevent it and seems also to stimulate the growth of the plant.

In light, loamy soils, in cold climates, 8 inches deep is not too much in the North. This depth seems to protect against drouth as well as frost.

Lilies like good drainage as well as plenty of moisture during the blooming season. In heavy soils that are not well drained they seldom succeed.

Not rarely some lilies do not appear above ground the first year after setting, but seem to go through a season of recuperation and come up strong and good the second spring. I have had L. Brownii and others do this, especially where imported bulbs were used which had become dry and the outer scales shrunken. When bulbs are stored in a cellar in tight boxes and in soil which is not allowed to become too dry, they will often winter in fine condition.

Many Lilies not only bear roots at the bottom of the bulb, but from where the stem joins the bulb near the surface of the beds have a large root growth. The Auratums are especially noted for this. It is well, therefore, to have plenty of well-composted manure worked in the soil to a good depth so that not only the ground under the bulb is enriched but near the surface also so that the roots above the bulb are stimulated.

BROWNII (L. japonicum var. Brownii). Bears 3 or 4 flowers, 7 to 8 inches long, partly drooping, chocolate-purple outside and white within. A very showy and desirable kind which is nice for cutting, or in any place. It is a durable one with me. July. \$2 each.
Canadense. Wild Yellow Lily. Flowers vary in color-red and yellow. Grows 2 to 5 feet high and is a most hardy species. Nice to plant among shrubbery, and does quite well in shade. June and July. 15 cts . each, $\$ 1.50$ per doz.
CANADENSE var. RUBRUM. 25 cts. each, $\$ 2.50$ per doz.
CANDIDUM. Ascension or Madonna Lily. Handsome, large, fragrant, pure white flowers. Easy of culture; does best when left undisturbed after planting. Our bulbs were grown in the north of France, and are fresh from beds. 30 cts. each, $\$ 3.00$ per doz.
CROCEUM. Golden yellow; closely follows L. Dahuricum in blooming. 30 cts. each.

ELEGANS, var. INCOMPARABILE. Deep red; one of the best easy growers. 20 cts . each, $\$ 2$ per doz.
ELEGANS var. ORANGE. A very vigorous and healthy form. 20c. each, $\$ 2$ per doz.
ELEGANS var. THUNBERGIANUM. Flowers pale scarlet. June. Japan. 20 cts. each.
ELEGANS var. UMBELLATUM. One of the more common forms and a rather strong grower. 20 cts . each, $\$ 2$ per doz.
GRAYI. This species has a bulb of about the same shape as Canadense, but smaller. The flowers are dark orange red, fine for cutting to go with white flowers. 40 cts. each.
HANSONII. See L. maculatum.

HENRYI. This is a splendid Lily from China, the most vigorous I have ever seen. Flowers closely resemble those of $L$. speciosum in shape but are a handsome deep orange-yellow, banded with green. Where soil, moisture and other conditions were favorable, I have known this Lily to grow and thrive ten or more years without any special care, sending out taller flower-stalks each season until fully matured, bearing magnificent clusters of its beautiful flowers in the greatest profusion. I consider it as healthy and permanent as any kind I have known. Like most other Lilies of the Speciosum class, it is well to cover it a little during the winter. 45 cts. each, $\$ 4.50$ per doz.
KRAMERI. See L. japonicum, var. roseum.
LEICHTLINII. See L. Maximowiczii.
MACULATUM (L. Hansonii). Under favorable conditions attains a height of 3 feet. The flowers of this species are reddish orange, six to ten in a cluster; petals thick and durable. A rare Japanese Lily that is rather high in price, but so permanent and healthy has it been with me that I consider it one of the cheapest. I have never lost a bulb after it was once established, and I have bulbs which have bloomed every year for years. 75 cts. each, $\$ 7.50$ per doz.
REGALE. Vigorous constitution, medium in height, bearing one to several handsome, white, fragrant flowers; slightly shaded pink outside and the lower inner surface prim-rose-yellow. It is a hardy Lily and I consider it one of the finest novelties offered in many years. It seems to thrive on any good soil not too wet. One customer from New Hampshire writes: "These of last fall did"so very well. I find it one of the easiest Lilies

to grow." Everyone who sees a L. Regaie bed in bloom admires it. Blooms about the same time as $L$. Candidum. 60 cts. each, \$6 per doz., S48 per 100.
SARGENTI Æ. This beautiful Lily, a native of Thibet and local in its distribution, grows taller than Regale, with its flowers in a cluster at the summit. Its white flowers have a chocolate shading outside. Too much moisture is not suited to this bulb nor too dry soil. S4.00 each.
SUPERBUM. American Turk's Cap Lily. This native Lily is one of the finest and most hardy of all. It often attains a height of 6 feet and produces a large number of flowers. Its flowers are bright orange in color, with dark spots. 20 cts. each, $\$ 2$ per doz.
TENUIFOLIUM. Siberian Coral Lily. One of the most delicate and charming species. One to 2 feet high, with one to fifteen or more nodding, rich scarlet flowers. 20 cts. each, $\$ 2$ per doz.
TESTACEUM. (L. excelsum). Handsome, nankeen-yellow flowers on a stalk 4 to 6 ft . high. A novel color in Lilies. \$2.00 each.
TIGRINUM, var. SPLENDENS. By far the best form of Tiger Lily I have had. It is taller, with handsome, large flowers and a much healthier plant. 15 c . each, $\$ 1.50 \mathrm{doz}$.
WILLMOTTI $\not$. This new and rare Lily was discovered by Mr. Wilson in the Province of Hupeh, China. It is a very floriferous and hardy Lily; as many as 28 blooms have been borne on a single plant. In color it is like a shade of orange, or technically, it is that of rouge saturne. It is still very rare in cultivation. It blooms with the Regale and seems to be quite hardy. $\$ 2$ each.

## Japanese Lilies

AURATUM. Gold-Banded Japan Lily. This is the most popular Lily grown. No species ever had so much general favor. It is a very variable species in the size, color, etc., of its flowers, and also in the time of flowering. A bed of one hundred Auratums will produce flowers over a longer time than a hundred of any other Lily species. Flowers white, with a central band and numerous deep purple spots. Height 2 to 6 feet, not rarely bearing twenty large fragrant flowers 8 to 12 inches across, with a fragrance so strong that a bouquet will fill a large church with their odor. A clump makes a glorious show. July and September. Largest-sized bulbs, 60 cts. each, $S 6$ per doz. A few small bulbs, 30 cts. each, $\$ 3$ per doz.
ELEGANS, var. FULGENS. (L. Batemanniæ). A strong variety, about $21 / 2$ feet high; deep apricot flowers. 40 cts. each, S4 per doz.
JAPONICUM, var. ROSEUM. (L. Krameri). All who see this Lily in flower admire it, and it is often thought to be the most delicately tinted of all. The flowers vary from pure white in a few to a deep reddish pink. They are of fairly good size, but of a most delicate structure, quite in keeping with the color. It is a little difficult to grow on account of the fall rains getting into the center of the bulb and rotting it. It is said that the Japanese often plant this Lily on its side, so that its scale will shed the rains, and to prevent the water from entering the center of the bulb. There seems to be little difficulty in having them live when fresh bulbs are set in the spring. 50 cts. each, $\$ 5$ per doz.

Lilium Auratum

LONGIFLORUM. A grand Lily, with pure white, funnel-shaped flowers, often 7 inches long. Often used for forcing for Easter to take the place of the more tender Bermuda Lily. 40 cts. each, $\$ 4$ per doz.
MAXIMOWICZII (L. Leichtlinii), var. REDDISH YELLOW. This is a later-blooming species than most of the red or yellow kinds. and stronger than the yellow variety. 40 cts. each, $\$ 4$ per doz.
RUBELLUM. I consider this the earliest Lily in my collection. The delicate pink flowers are showy and last well. While it is not so robust and durable as $L$. speciosum it is a longer-lived species than $L$. Krameri 50 cts. each, $\$ 5$ per doz.
SPECIOSUM, var. ALBUM. About the
same as the well-known L. speciosum rubrum, except that the flowers are white. It is a more expensive Lily. August and September. 60 cts . each, $\$ 6$ per doz.
SPECIOSUM, var. MAGNIFICUM and MELPOMENE are sub-varieties of $L$. speciosum rubrum and will be supplied at the same price as rubrum as long as stock lasts. 50 cts. each, $\$ 5$ per doz.
SPECIOSUM, var. ROSEUM. White, shaded and spotted with rose. 50c. ea., $\$ 5$ per doz.
SPECIOSUM, var. RUBRUM. This fine, late-blooming plant from Japan is one of the most showy of Lilies; of medium height, and not difficult to grow. Blooms in August and September. Good flowering bulbs, 50 cts. each, $\$ 5$ per doz.

Liatris Pycnostachya
LATHYRUS latifolius. Perennial Pea; Everlasting Pea. A very desirable perennial, and though the flowers are not fragrant, like the sweet pea, they are very handsome and well worth growing. 20 cts. each, $\$ 2$ per doz.
L.-, var. White Pearl. A fine white variety with large purest white flowers. 25 cts. each, $\$ 2.50$ per doz.
LIATRIS. Gay Feather; Button Snakeroot. A group of plants of the composite family, with purple or nearly white flowerheads. Fine for the border. Liatris are easily grown from seed, bloom continuously and last for years.
L. pycnostachya. Prairie or Kansas Gay

Feather. Long spikes of rose-purple flower-heads. 20 cts. each, $\$ 2$ per doz.
L. scariosa. This is a much showier form than is usually sent out for this plant. It has large, showy, purple heads and flowers much later than the others. A very imposing form. 20c. each, $\$ 2$ per doz.
L. spicata. Has spikes of good-sized purplish flower-heads, 6 to 15 inches in length. Blooms profusely. August. 20 cts. each, $\$ 2$ per doz.
LINUM austriacum. Australian Flax. Has pale blue flowers in June and July. It is a pretty border plant and remains for a long time in bloom. June. 20 cts. each, $\$ 2$ per doz.
L. flavum. Is rather low in growth, with many branches, which terminate in a great number of bright yellow flowers. June and July. 20 cts . each, $\$ 2$ per doz.
lobelia cardinalis. Cardinal Flower. The Cardinal Flower of our swamps and brooksides. Is one of the most striking of our wild flowers; often 4 feet high. Its elongated spikes of deep scarlet flowers attract attention in any place. Though naturally found in moist and boggy soil, it takes kindly to cultivation, and may be grown with success in any good garden soil. August. The Cardinal Flower may be naturalized by sowing the seed in moist places where the surface is always damp, and even in partial shade, where it will grow without care. It is like the fringed gentian in this respect, but will do with more shade than the gentian. It should be shaded for three or four days after transplanting. 15 cts. each, $\$ 1.50$ doz.
LUPINUS polyphyllus. Has good sized spikes of handsome blue flowers in June, attains a height of three feet and is a desirable plant for the border, or to grow among shrubbery. 15 c . each, $\$ 1.50$ doz.
L.—, var. albus. A white variety of the preceding and makes a lovely combination when planted with it. 25 cts . each, $\$ 2.50$ per doz.
L.-, var. roseus is a new form with rosecolored flowers. A desirable new flower. 25 cts. each, $\$ 2.50$ per doz.

## LYCHNIS. A showy class.

L. alpina. Has pink flowers, in close, compact heads half an inch wide. Plant about 6 inches high. A native of the Alps. May. 15 cts. each, $\$ 1.50$ per doz.
L. Chalcedonica. Maltese Cross; Jerusalem Cross; Scarlet Lightning. Two to 3 feet high, with white or scarlet flowers in good-sized corymbose heads. Give it a rich soil and it will bloom all summer. June. 20 cts. each, $\$ 2$ per doz.
Iychnis coronaria. Mullen Pink; Rose Campion. Flowers red; showy in June. 15 cts. each, $\$ 1.50$ per doz.
L. Flos-cuculi. Ragged Robin. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
L. dioica. (L. diurna, var. rosea). About 2 feet high; rose-purple flowers. A native of Britain; hardy, showy. Naturalized along woodland walks or half shaded borders, it will live and make a good showing while in bloom. May and June. 20 cts. each, $\$ 2.00$ per doz.
L. Flos-Jovis. Grows 12 to 18 inches high making a clump. Flowers in a rather dense umbel. Individual flowers half an inch wide or less. 20 cts. each, $\$ 2$ per doz.
LYTHRUM Salicaria, var. roseum superbum. Rosy Strife. A rose-colored form of L. Salicaria, a native of England, where it is found growing on the margins of lakes and streams. Height 3 to 5 feet, bearing leafy spikes of rose-purple flowers. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
malva moschata. Musk Mallow. Flowers rose or white, about 2 inches wide, in terminal auxillary clusters; height about 2 feet; branching. A handsome perennial of Britain. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100 .
MERTENSIA virginica. Virginia Cowslip; Blue Bells. A foot or two high, with dark green foliage, and loose panicles of rich blue-purple flowers in early spring. 20 cts. each, $\$ 2$ per doz.
Mitella diphylla. Bishop's Cap; Miterwort. The plant is a low and slender one with pretty, small, white flowers in racemes 6 to 8 inches long. Nice for the rockery and likes partial shade. 15 cts. ea.
MONARDA didyma. Oswego Tea; Bee Balm; Fragrant Balm. Cardinal-red flowers in large, showy heads 2 or more inches across, on leafy, angled stems about 3 feet high, and when massed for distinct effects against a dark background, its brilliant flowers give bright, semi-tropic garden pictures in summer. 20 cts. each, $\$ 2$ per doz. $\$ 12$ per 100.
MYOSOTIS. FOR-GET-ME-NOT.
M. alpestris, Victoria. 20c. each, $\$ 2$ doz.
M. scorpioides, var. semperflorens ( $M$. palustris). True Forget-me-not. A

Malva Moschata
fine plant for gardens and for moist, wet grounds. 15 c . each, $\$ 1.50$ doz, $\$ 10$ per 100.
onothera. Evening Primrose.
©. Missouriensis. A low, caulescent perennial with decumbent stems and bearing many large, auxiliary, yellow flowers. A very permanent plant in well-drained, sandy or gravelly soil, but not difficult to establish in any good garden soil. 20 cts. each, $\$ 2.00$ per doz.
©E. Youngi. A very showy variety, producing large, bright yellow flowers the entire summer; 3 ft . 20c. each, $\$ 2$ per doz.
©. Speciosa Alba. White flowering. 20 cts. each, \$2 per doz.

Paeonia Festiva Maxima

P $\not \subset O N I A$ albiflora. ( $P$. chinensis). Chinese Peonies. Among the many popular herbaceous plants it would be hard to find one that fits into any position in the garden or grounds like the Peony. The gorgeous display of flowers in their season is very effective, while the dark green foliage is at all times attractive. What better frontage for shrubs or, in fact, for any large or small plantation, than Peonies? They are also suited to massing in beds by themselves. While Peonies may be planted with good results in spring or fall, there is probably no better time than from August 20 to the middle of September. Give the borders or beds a deep and thorough spading; yes, trench the ground, working in a liberal supply of the best decomposed manure and again a topdressing of the same in spring. Avoid planting too deep; a couple of inches of earth over the buds is sufficient. Don't expect too much of them the first year. They are a little slow in their growth, but after a couple of seasons, if they have been well cared for, you will have no reason for regretting the extra pains in setting. They bloom in June.
Double Mixed. We have a large block of mixed, or rather unidentified varieties, but kinds that are of real value for massed plantings, or for those who grow Peonies for the flower itself and are not concerned with names. 40 cts. each. $\$ 4$ per doz.

Festiva maxima. Rose type. Conceded to be the most popular of all the Peonies. Very large, clear white flowers, prominently flecked crimson, the outer petals sometimes tinged lilac-white on opening. Very tall and erect and equally useful for massing or cutting. 3 year, $\$ 1$ each, $\$ 10$ per doz.
Felix Crousse. Bomb type. One of the very best in the red section. Fine, large, globular flowers, brilliant red in color. Strong, vigorous growth; medium in height and very free. Fine as a cut-flower or for garden effect. 3 year. $\$ 1.25$ each, $\$ 12$ per doz.
Teas' No. 1. A large, full-double, blushpink, flower, delicately fragrant and a most exquisite shade. 3 year. $\$ 1$ each.
Victor Lemoine. Medium-sized, globular, semi-rose type. Very dark, crimson guards, prominently streaked light center, flecked green. Medium tall, drooping habit. Early mid-season, 3 year, 75 c each
Baron James de Rothschild. Crown type. Pale lilac-rose, intermingled with cream. Medium sized flowers, but very free and fragrant. Vigorous growth. 3 yr. $\$ 1.25$ each, $\$ 12$ per doz.
Albert Crousse. Bomb type. An immense full flower of good form; rose-white in color, lightly and prettily flecked with crimson. Tall, erect babit of growth and
very free flowering. A valuable lateflowering kind for any purpose. 2 year. \$2 each.

Ambroise Verschaffelt. Rose type. A fine, large bloom, dark violet-crimson in color, retaining its uniform color well in the sun. Good habit of growth and quite free. 3 year. 75c. each, $\$ 7.50$ doz.

Rosy Dawn. Single, large, snow-white
flower, tinged blush at first, resembling a great white water-lily. 3 year. $\$ 1.25$ each, $\$ 12$. per doz.
P. officinalis, var. rubra-plena. This old-fashioned type comes into bloom some two weeks before the other varieties. The flowers are large, full, very fragrant, and decidedly attractive in the garden or oldfashioned border. 40c. each, $\$ 4$ per doz.
Mixed Seedlings. 20 cts. each, $\$ 2$ per doz.

## Special Offering of Paeonies

These are all standard sorts of which we have a large quantity. All three and four year old clumps that have been grown in our nursery for several years, have flowered and proven true to name. All are double or semi double.

Duchess of Orleans. Pale red and blush.
A charming variety.
Charles Russela. Double; red.
Mary Tudor. Flower semi-double; rose; creamy center.
Golden Harvest. Medium size, crown shaped; pale lilac rose, and cream white center, crown pink; fragrant; medium height.

Rose de Gendbrugg. Pale rose.
Professor Morren. Pale pink.
Sappho. Dark rose.
Mutabilis. Pale pink.
Reevesii. Fine; full-double, pink.
Crimson Queen. All that its name implies.
Teas' No. 3. A fine double; red.
Brightness. Double, pale rose outside, creamy center.

Collection of one each of the above varieties $\$ 5.00$ Two each of the above $\$ 9.00$. Dozen lots of any one variety $\$ 5.00$.

Pentstrmon Laevigatus

PANSIES. See Viola tricolor
PAPAVER nudicaule. Iceland Poppy. White, reddish orange or bright golden yellow flowers. Very hardy and a permanent perennial when established in congenial soil. May to November. 20 cts. each, $\$ 2$ per doz.

## LARGE ORIENTAL POPPIES Papaver Orientale

Mrs. Perry. A fine salmon-rose. One of the best of the large poppies.
Perry's White. A valuable addition to the list of perennials. The flowers are pure satiny white, with a crimson-maroon blotch at the base of each petal.
Gerald Perry. One of the most attractive of the oriental Poppies yet seen. Large flowers of a uniform shade of apricot pink, conspicuously blotched crimson.
Any of the above, 50 cts. each.
Papaver orientale. Oriental Poppy. A most attractive plant, easy of culture, and with me one of the most permanent of perennials. A loamy or slaty soil with good drainage is right for it. 15 cts . each.
P.-, var. Mahony. The darkest carminepurple. 30 cts. each.
P.—, var. Royal Scarlet. It is a fine hardy perennial, having great red flowers with dark center. 25 c . each, $\$ 2.50$ per doz.

PENTSTEMON. Beard-Tongue. This genus comprises a large number of variously colored flowers. Few genera among the popular hardy perennials afford a greater number that are so attractive. Their natural gracefulness, variety of colors, and great abundance of flowers make them useful in many places. They like a sandy soil, with leafmold inter-mixed, and plenty of moisture in summer, but in winter good drainage is essential. Though hardy as a rule, too much frost with an excess of moisture in winter seems to be fatal to most of this genus. Every flower-garden should have at least a few of these lovely flowers.
Pentstemon acuminatus. Lilac or violet flowers in July. Stems erect, about a foot high. A very attractive flower and nice for cutting. 20c. each, $\$ 2$ per doz.
P. barbatus, var. Torreyi. About 2 feet high; showy flowers; red or scarlet. One of the most attractive. 25 cents each, $\$ 2.50$ per doz.
P. grandiflorus. One of the showiest, with thick, leathery leaves at base of stem and long, one-sided spikes of large, showy, lilac or purple flowers. 25 cents each.
P. lævigatus ( $P$. digitalis). Common on moist grounds in the West. Though not so showy as some, its flowers are quite

Papaver nudicaule

Richard Wallace White, violet center.
Rijnstroom (Rhine Stream). A grand new Phlox, resembling Pantheon, but with larger flower-heads. A soft, clear pink; medium height and strong grower. 25 cts. each.
R. P. Struthers. Rosy carmine with claret-red eye.
The Pearl. One of the best white Phloxes. Medium tall and an excellent variety.
Von Lassburg. Handsome pure white with very large individual flowers.
Tapis Blanc. Rather dwarf with beautiful heads of large white flowers. One of the best dwarf whites. 25 cts . each.
Wm. Ramsey. Dark purple.
W. C. Egan. Delicate, soft shade of lilac. 25 cts. each.
P. suffruticosa, Miss Lingard. A fine, free-blooming Phlox, coming into flower much earlier than other kinds and continuing through the season. 20 cts . each, $\$ 2$ per doz.
P. amœna. A low species, native to dry hills and barrens. Flowers pink, purple and occasionally white. This form is pink.
P. subulata. Moss Pink. Creeping and tufted, forming broad mats. Flowers pure white to rosy red. May and June. 15 cts. each, $\$ 1.50$ per doz.
P.-, var. alba. 15 c . each, $\$ 1.50$ per doz.

PHYSOSTEGIA virginica. False DragonHead. Flowers about an inch long, varying in color from purplish red to pink and white. 15 cts. each, $\$ 1.50$ per doz.
P.-, var. alba. The white form of this plant is very pretty and fine for cutting. 20 cts. each.
PLATYCODON grandiflorum. JAPANESE Bellflower. Six to 15 inches high. Large, solitary, white or blue flowers at the ends of the branches. China and Japan. Summer. 15 cts. each, $\$ 1.50$ per doz., $\$ 10$ per 100.
P.-, var. album. 30 cts. each.
P.-, var. Mauve-pink. 30 cts. each.
P.-, var. album. 30 cts. each.
P.-, var. Mariesii. Not so tall as the typical grandiflorum, but with large blue flowers in great profusion. 20 cts. each, $\$ 2$ per doz.
PODOPHYLLUM peltatum. Mandrake; May Apple. A good plant for shade. The flower is pure white or nearly so, of good size, but often hidden by the foliage. It has large, round, lobed, peltate leaves. 20 cts. each.

Platycodon Grandiflorum
POLEMONIUM Van Bruntia. ( $P$. cæruleum). Jacob's Ladder. A fine border plant, with handsome blue flowers in early summer. May and June. 20 cts. each, $\$ 2$ per doz.
Polemonium reptans. Greek Valerian. Loose panicled corymbs of blue or sometimes white flowers. Plant 6 inches high, blooming in spring. 20 cts . each,
POLYGONATUM multiflorum. DAVID's Harp; Lady's Seal. One to 3 feet high, with small white flowers. A nice plant for the wild garden. Last of May. 15 cts . each, $\$ 1.50$ per doz.
POLYGONUM amplexicaule. Mountain Fleece. Strong-growing plant, 3 to 5 ft . high. Flowers nearly white, borne very profusely. Makes a brilliant display in the garden. Needs a little covering in Vermont, as it is somewhat tender. 15 cts. each, $\$ 1.50$ per doz.
POTENTILLA rupestris. Flowers white, borne on long stems; a fine plant for dry places, 12 cts. each, $\$ 1$ per doz.

PRIMULA officinalis. ( $P$. Veris of Lehman and of Linænus in part). Cowslip; Palsywort. Plant in rich, well-drained soil, in the border or in the rockery. Flowers vary from a clear yellow to pleasing shades of yellow and maroon. 20 cts. each, $\$ 2$ per doz.
P. officinalis, Clear Yellow. 35 cts. each.

RUDBECKIA laciniata, var. "Golden Glow." One of the finest plants, 6 to 8 feet tall, with large, full, double, golden yellow flowers in great profusion. Two or three plants will soon make a fine clump. 15 cts. each, $\$ 1.50$ per doz.
SALVIA azuria, var. grandiflora. Sage. Delicate, blue flowers in August. A permanent plant of easy culture, adding a much-needed touch of blue to the garden when yellow seems to be predominent. 20 cts. each, $\$ 2$ per doz.
SANGUINARIA canadensis. Bloodroot. Has very pretty white flowers in early spring, an inch or two wide, followed by large, heart-shaped leaves, which remain until Autumn. It will do well in shade, and on this account is one of the most valuable for the shady corner. 12 cts. each, \$1 per doz., \$6 per 100 .

SAPONARIA officinalis. Common Soapwort; Bounging Bet. Will grow in the poorest soil. 12 cts . each, $\$ 1.20$ per doz.
SEDUM. Stonecrop. A very large genus, comprising more than a hundred species of plants, mostly hardy, and natives of temperate or frigid zones Their flowers are mostly white or yellow, sometimes pink or blue.
S. acre. Wall Pepper; Mossy Stonecrop. A pretty species for rockwork; well known and considerably used. 10 cts. each, $\$ 1$ per doz.
S. Aizoon (S. Maximowiczii). Flowers yellow, opening in a dense, flat, spreading cyme in late summer. About a foot high. Japan. 15 cts. each, $\$ 1.50$ per doz.
S. hybridum. A low, creeping plant, forming compact tufts, 4 to 5 inches high, with handsome yellow flowers in umbellate cymes, 2 to 3 inches across. A native of Siberia and flowers in summer. Does well in dry, rocky places. 12 cts. each, $\$ 1.25$ per doz. $\$ 6$ per 100.
S. maximum. A stout, bushy plant, 2 ft . high or less. Flowers whitish with red spots toward the tips. 20 cts . each.
S. pallidum, var. rose-

Sedum Spectabile
S. spectabile, var. purpureum. This form is much better than the type, having larger and darker purple flowers and larger cymes. 20 cts. each, $\$ 2$ per doz.
S.-, var. Brilliant. This form has still deeper rose flowers, and is an improvement on the Purpureum. 15 cts . each, $\$ 1.50$ per doz., $\$ 10$ per 100 .
S. spurium coccineum. Rose-purple flowers; low-growing, nice for rocks. 12 cts. each, $\$ 1.20$ per doz.
S. stoloniferum. A species from Asia Minor, with pink or white flowers. 12 cts. each, $\$ 1.20$ per doz.
S. Telephium. The common Live ForEVER of the meadows. Good for rocky, barren situations. 10c. each, $\$ 1$ per doz.
SMILACINA racemosa. Height 1 to 3 feet. Flowers white, in terminal racemes. Natural to moist copses of the northern states. 15 cts. each, $\$ 1.50$ per doz.
STACHYS lanata. Woolly Woundwort. The blooms are striped, in whorls; leaves thick, soft and woolly. A fine border plant blooming in June and July. 12 cts. each, $\$ 1.20$ per doz.
STATICE latifolia. Sea Lavender. A handsome plant, 2 feet high, from a deep root. Scape much branched, panicle large and spreading, flowers blue, midsummer. As useful in cutting as Gypsophila. A hardy and permanent plant,
which should be given a deep soil, sunny position and left undisturbed. Its color gives a most desirable touch to the hardy border and is very attractive. 20c. each.
STOKESIA cyanea. Stoke's Aster. A rare hardy plant of the Aster family; 12 to 18 inches high, and very thrifty. Of surpassing beauty, with blue flowers in August. Leaves are rich green. 20c. each, $\$ 2$ doz.
TANACETUM vulgare, var. crispum, is the cut-leaved form of the common Tansy. It is interesting both for the foliage and for its flowers. 12c. each., $\$ 1.25$ per doz.
THALYCTRUM dasycarpum. Purple Meadow Rue. Two to 4 feet high; purplish stem; flower purple and greenish. Grows naturally in dry upland 20 cts. ea.
T. dioicum. EAR L y Meadow Rue. One to 2 feet high; flowerspurplish and greenish in amplepanicles dioecious, coming in April and May. Nice for plantinginshade 15 cts. ea.
T. minus. A somewhat variable species 1 to 2 ft . high; blooms in summer. 15 cts. each, $\$ 1.50$ per doz.
T. polyga-

## mum. Tall

Meadow Rue. Stately plant, when grown in rich, moist soil. Flowers white; foliage good. 15 cts. each, $\$ 1.50$ per doz.
THERMOPSIS Caroliniana. Grows 4 feet high with bright yellow flowers. 25c each.

Trillium Grandiforum

TIARELLA cordifolia. False Miterwort; Foam Flower. Handsome in leaf and flower; quite hardy; easily increased, and at home in any moist, sandy soil. Fine for the shady corner, shady or sunny portions of the rockery, or, if not too dry, in full sun. Creamy white flowers, starshaped, massed on stems above the foliage. May. 15 cts. each, $\$ 1.50$ per doz.
TRADESCANTIA virginiana. Spiderwort. A good plant for decorative purposes among shrubbery or along the margins of woodland walks. After a time forms fine, large clumps, 10 to 13 inches high, with numerous terminal umbels of large, light blue flowers. 15 cts . each.
TRILLIUM. Wood Lily; Wake Robin. Early flowering bulbous plants, which are generally fond of shade. Large, handsome, dark green leaves, which continue for a long time after the flower. If planted in spring, it should be done early. Autumn or late summer is the best time to
transplant them. Clumps of Trilliums interspersed among the shrubbery make a most interesting feature of the garden. They bloom profusely in spring.
T. cernum. Nodding Trillium. About a foot high, bearing three leaves with a nodding white flower. 15 c . each, $\$ 1.50$ doz.
T. erectum. The common purple flowered kind; one of the first in bloom. 12 cts . each, $\$ 1.10$ per doz.
T. grandiflorum. Generally considered the best, and probably a thousand of it are sold to a hundred of any other kind. A very charming plant, blooming in early spring and liking shade. Very hardy and increases rapidly. 10 cts each, 75 cts . per doz., $\$ 4$ per 100 .
T. undulatum (T. erythrocarpum). Painted Trillium. This native of cold, damp woods is more difficult to grow than some. It needs leaf mold and deeper setting, but will amply repay the extra care when established. 12 cts. each, $\$ 1.25 \mathrm{doz}$.

Valeriana Officinalis
TROLLIUS europæus. Common Globe Flower. Stems 6 to 20 inches high, bearing pale yellow flowers an inch or more wide. A very interesting plant with handsome flowers. June to August. 20 cts. each, $\$ 2$ per doz.
TUNICA Saxifraga. Has small pink flowers in the greatest profusion. Nice for the low border or for rockwork; blooms profusely. 20 cts. each, $\$ 2$ per doz.
ULMARIA Filipendula (Spiræa Filipendula). Meadow Sweet; Dropwort. Flowers white or rose outside; stem 2 to 3 feet high, grooved, erect, with a few small leaves. Tuberous-rooted, herbaceous perennial. June and July. A native of Europe. 15 cts . each, $\$ 1.50$ per doz.
U. purpurea. One of the finest of Meadow Sweets. 2 to 4 feet high. 15 cts . each.
UVULARIA grandiffora. Bellwort. Ten to 18 inches high, forking above numerous light green leaves and pale yellow flowers. Spring. 12 cts . each, $\$ 1.20$ per doz.

VALERIANA coccinea. Showy heads of red dish flowers, June to October. Two feet. 15 c . each, $\$ 1$ per doz., $\$ 10$ per 100 .
V. officinalis. Hardy Garden Heliotrope. An old-time favorite. Showy heads of rose-tinted white flowers during June and July. Tall-growing with a delightful heliotrope odor. 30 cts . each. $\$ 3$ per doz.
VERONICA longifolia. Two feet high; lilac flowers. 12 cts. each, $\$ 1.20$ per doz.
V.-, var. subsessilis. By far the finest of the hardy Veronicas. The flowers are large, and of an intense blue. A very decorative plant; quite permanent. 35 cts. each, $\$ 3.50$ per doz.
V. spicata. Handsome bright blue flowers in a dense spike; blooms profusely. Europe. 20 cts. each, $\$ 2$ per doz.
Viola. Violet.
V. canadensis. Canadian White Violet. One of the best of Wild Violets. Not rarely 18 inches high, branching and bearing numerous white-and-purple flowers. 12 cts. each, $\$ 1.25$ per doz.
V. cornuta. Horned Pansy; Tufted Pansy. The recently added varieties of this charming plant have greatly enhanced its value as a class, which is distinct from the common pansy. Partial to moist soils; comes readily from seeds. 15 cts. each, $\$ 1.50$ per doz.
V.-, var. alba. Like the preceding except flowers are pure white. One of the daintiest. 15 cts. each, $\$ 1.50$ per doz.
V. odorata, var. alba. 20 cts. each.
V. pubescens. Downy Yellow Violet. Six to 12 inches high, with broadly heartshaped leaves and yellow flowers. 15 cts. each, $\$ 1.50$ per doz.
V. palmata, var. cucullata. Hooded Violet. Blue Flowers. 12 cts . each, $\$ 1.20$ per doz.
V. tricolor. Pansy. Very popular. The flowers are borne profusely on long stems. It prefers a cool moist bottom. Steele's Mastodon Strain. 10c. each, $\$ 1$ per doz.
YUCGA filamentosa. Adam's Needle. Leaves about an inch wide. Pyramids of white, bell-shaped flowers in July. 4 to 8 feet high. 25 cts. each.
English Bedding Violas. These Violas flower as profusely as pansies throughout the year, and as they are perennials, do not have to be replaced so often. The blooms are large and the colors true and fine. A well cared for bed is a sight long remembered. Blue, white and yellow, in separate colors. 15 c. each, $\$ 1.50$ doz.

## HARDY TERRESTRIAL ORCHIDS

This charming, hardy group contains some of the most showy hardy plants in cultivation They are very easy to manage, and exceedingly attractive when in flower. No class of plants has more admirers, and all who have had the pleasure of seeing them growing have doubtless been struck with the lovely and varied coloring of some of this family. To see them growing in their habitat is a treat which comparatively few can enjoy, but with a little trouble we have the pleasure of their flowers at home in our garden.

APLECTRUM hyemale. Putty-Root; Adam and Eve. Flower stalks 10 to 15 inches high with about 10 flowers which are yellowish, tinged with madder-purple. By the time the flowers are fully developed, the single leaf at the base of the stem has faded and soon disappears, to come up again in October. Very odd and attractive. 50 cts . each.
CALOPOGON pulchellus. Flowers in loose racemes-magenta-crimson, rarely white. Native to open bogs and meadows. 15 cts. each.
CYPRIPEDIUM parviflorum. Small Yellow Lady's Slipper. One of the best native orchids; 6 to 15 inches high, with one or more bright yellow flowers. The brown-purple spiral petals contrast nicely with the yellow lip; fragrant. Does well in sandy soil, with a mixture of peat or leaf mold; likes some shade. May and June. 25 cts. 3, 5, 6, or more buds at 25 cts. a bud.
C. acaule. Common Lady's Slipper. This is another handsome native, beautiful, rose-colored flower 2 inches in length. Suited to well-drained fissures of rockwork. 20 cts. each. $3,5,6$, or more buds at 20 cts. a bud.
C. hirsutum (spectabile). Showy Lady's Slipper. The grandest of all terrestrial orchids. The flowers are borne on leafy stems 2 feet or more high. The pouch is much inflated, of a deep rose-purple or almost white, while sepals or petals are white. May be forced in peat or grown outside. It likes a considerable amount of moisture, but no stagnant soil will suit. Strong, single-budded plants, 25 cts . each; plants with 2 flowering buds, 50 cts . each. A few larger plants, with $3,5,6$ or more buds at 25 cts. a bud.
EPIPACTIS pubescens (Goodyera pubescens). Rattlesnake Plantain. Reticulated leaves which are very pretty, are clustered at the base from which springs a
stalk 12 to 18 inches high, terminating in a close spike of white flowers. These flowers are pretty enough in their season, but the leaves, lasting fresh through the winter, are very attractive. Needs shade and peat or leaf-mold. 15 cts. each, $\$ 1.50$ per doz.
E. repens. Grows 6 to 12 inches high. Leaves much smaller than in pubescens. Flowers white. 35 c each.
E. tesselata. Stems average about 8 inches high; leaves ovate to oblong-lanceolate, faintly veined. 35 cts . each.
HABENARIA blephariglottis. White Fringed Orchids. An attractive whiteflowered Orchid of our northern swamps and bogs. Flowers in short roundish or oval heads. 50 cts. each, $\$ 3.50$ per doz.
H. fimbriata. Usually a little taller than Psycodes, with longer leaves and more densely flowered spike. Rich, wet deciduous woods and borders. Flowers paler than those of Psycodes; leaves broader. We can offer only a few at \$1 each.
H. psycodes. A rather pretty plant, native to wet swamps and meadows, about 2 feet high. Flowers purplish in a dense spike. 30 cts. each.
LIPARIS Lœselii. Twayblade. Grows 2 to 6 inches high from a bulbois root. Leaves elliptic or oblong, keeled. Flowers greenish yellow, five to ten on a stem. 15 c each.
POGONIA ophioglossoides. Flowers usually single, pale pink. Roots fibrous. 20 cts. each.
ORCHIS spectabilis (Galeorchis Spectabilis).
Showy Orchis. Grows 4 to 7 inches high, with two oblong leaves at the base; short, loose spikes of pink-purple flowers in May. Native to rich woods. 20 cts. each.
SPIRANTHES cernua. Ladies' Tresses. Grows 6 to 12 inches high. Leaves mostly radical. Flowers white; fragrant. Open, grassy, moist meadows and pastures. 20 cts. each.

The most of these orchids are quite permanent when established in the right soils. I have seen one or two Lady's Slipper planted where they lasted five years; in one case sixteen years.

In the last 20 years Hardy Ferns have gained much in popularity in America. They seem so well fitted for shady locations, where little else would succeed, that large numbers are often used to fill space which seems suited to them alone. I believe it is usually understood that the right sort of enrichment for Ferns is decayed peat or good leafmold, also well-decomposed chip dirt. The dark soils of our deep woods are suited to these shade-loving plants. I say "shadeloving", because the majority are found only in shade in their natural homes, though a few thrive in very dry and sunny situations. As a rule, they are easy to grow. In fact, in some soils a few are inclined to spread and become weeds. We have hilly moist pastures in Vermont which are almost entirely given up to some species. This, however, is in only a few favored places and not many species are so inclined to spread. When they become well established in congenial soils, they are quite permanent and need almost no care, except to be let alone.

Though I have never tried barnyard manures under Ferns, I have read so often that maunres are not congenial to them that I feel warranted in not advising their use. It may be that well-composted manures, where no further decomposition is possible, can be used sparingly under Ferns, if no leaf-mold or similar soil is obtainable, but it should be used sparingly and never when the leaf-mold is at hand. Some locations which are in the shade are not good for ferns. The ground under Maple trees is often so sapped of all moisture and enrichment that hardly anything else can live there.

Various fronds

## Adiantum

PEDATUM. Maidenhair Fern. One of the most popular species of hardy sorts. It makes a good pot plant, and is at home in almost any good garden soil where sufficient moisture is near, and drainage as well. It grows naturally in shade and also in the sun. The chief characteristics of this fern are its airy poise and delicate frond texture. 15 cts. each, $\$ 1.50$ per doz. \$6 per 100.

## Aspidium

CRISTATUM. A small, narrow-fronded plant which grows in moist meadows and swamps, but more commonly around old stumps and decayed trees in open meadows and pastures. It makes one of the best plants in cultivation. 20c. ea., $\$ 2$ doz.
CLINTONIANUM. A much larger plant than the true type of A. cristatum; attains a height of 4 feet when grown under the most favorable conditions. It is usually found in shade, and is fine for the north side of the house. 25 cts . ea., $\$ 2.50$ doz.
GOLDIEANUM. Not rarely attains a height of 4 feet in its natural home. It is one of the finest Aspidiums. Moist, welldrained, loamy soil is good for it. 25 c. ea.
MARGINALE. Quite common on rocky hillsides. Its large, light-green fronds have a bluish tinge and are very durable; cut specimens will keep a long time. A valuable Fern for rocky or shaded slopes, or, in fact, for any place where it may be grown. 20 cts . each, $\$ 2$ per doz.

Dicksonia punctilobula

Aspidiums are beautiful planted in masses
structed as to be very handsome. It is worth any amount of care and trouble to make it grow. 20 cts. each, $\$ 2$ per doz.
THELYPTERIS. Varies much on different soils. Fronds are about 2 feet high, long and narrow. Fine for giving variety to the front bed. 15 cts. each.

## Asplenium

AGROSTICHOIDES (A. thelypteroides). Silver Spleenwort. Attains hegiht of 3 feet and has fronds 3 to 5 inches wide. It is one of the ferns which grow alone if in good, moist soil. 20c each, $\$ 2$ per doz.
ANGUSTIFOLIUM. Spleenwort. A fine tall Spleenwort, growing in moist ravines, and often 3 feet high. Needs shade and a moist, rich soil. 25 cts. each, $\$ 2.50$ doz.
FELIX-FEEMINA. LADY Fern. Has a larger number of cultivated forms in Europe than

Aspidium marginale

Osmunda cinnamomea
any other of our common Ferns. One to 3 feet high, with fine, delicate fronds, and very hardy. Shade and sun are alike congenial, if soil is sufficiently rich and moist. Grows vigorously. 20 cts. each, $\$ 2$ per doz.
PLATYNEURON. (A. ebeneum). Usually 9 to 15 inches high when fairly established. A fine little fern, with narrow, ever-green fronds, which are very handsome. Found on rocky soil. 20 cts. each, $\$ 2$ per doz.
TRICHOMANES. Maidenhair Spleenwort. This does well in shaded rockwork and will grow on shaded cliffs if moist. 20 each, $\$ 2$ per doz.

## Camptosorus

RHIZOPHYLLUS. Walking - Leaf. Is found on the margins of shaded cliff rocks where the leaf mold has formed a good black soil, and is always shaded. Where such locations can be imitated, it is a good plant and will prove a very ef-
fective addition indeed where plants are needed for a shady place. 25 cts. each.

## Cystopteris

B ULBIFERA. Bladder Fern. Its fronds are not rarely two feet long, but quite narrow. They are widest at the bottom and taper to a narrow point at the top. Exceptionally useful on damp, rocky banks. A most interesting Fern. 15 cts. each, S1.50 per doz.
FRAGILIS. This is a variable Fern, growing over a wide area. It is smaller and more fragile than the Bulbifera. It makes a nice plant for rockwork. It is found in partial shade
or full sun. 15 c . each, $\$ 1.50$ per doz.

## Dicksonia

PUNCTILOBULA (D. pilosiuscula). Hayscented Fern. Very abundant in the mountain pastures of New England. Delicate and easy of culture, it is one of the best. 20 cts . each, $\$ 2$ per doz.

## Onoclea

Struthiopteris. Ostrich Fern. One of the most stately and one of the best for cultivation. Not rarely over 4 feet high, with handsome, dark green fronds growing in a circle, forming in outline a handsome vase. It is not evergreen, but lasts until frost kills the fronds. It likes to be shaded a part of the day and will stand considerable moisture. 20 cts. each, S2 per doz.

Polystichum plant

SENSIBILIS. Sensitive Fern. A common plant in moist ground; though nice to establish in some places, I do not consider it so good as many others. 12 cts. each, $\$ 1,20$ per doz., $\$ 6$ per 100 .

## Osmunda

## FLOWERING FERN

The Osmundas are a grand group of large, tall growing ferns, which, when established in right soils and locations, make fine plants. $O$. regalis and $O$. cinnamomea grow in more moisture, as a rule, than $O$. Claytonia; but with good treatment and intelligent selection of location, the three may be grown together. It will not be the first or second year that the full benefit comes from the planting of these species; after they have become established, much handsomer fronds appear.
Cinnamomea. Cinnamon Fern. 20 cts. each, $\$ 2$ per doz.
CLAYTONIANA. Clayton's Flowering Fern. 20 cts. each, $\$ 2$ per doz.
regalis. Royal Fern; Buckthorn Brake. 20 cts. each, $\$ 2$ per doz.

## Phegopteris, Cliff Brake

HEXAGONOPTERA (Polypodium hexagonopterum). Hexagon Beech Fern. Has broader fronds; very delicate and pretty. Grows in any good, moist soil, where it will
not get too dry and still have drainage. 15 cts. each, $\$ 1.50$ per doz.
POLYPODIOIDES. 5 to 8 inches high. A very delicate little Fern which will grow in rockwork or level culture in partial shade. 15 cts. each, $\$ 1.50$ per doz.

## Polystichum

BRAUNII. Shield Fern. Comes from the shaded brooksides of the higher mountains of New England. A very handsome Fern, though not so common as most of the hardy sorts. 20 cts. each, $\$ 2$ per doz.

Foundation Planting of Ferns

ACROSTICHOIDES (Aspidium acrostichoides). Dagger Fern; Christmas Fern. A widely known species; its fronds are used by the trade in bouquets. One of the easiest to manage, and about the best evergreen hardy Fern we have. It grows on rocky, half-shaded hillsides and in swamps. Is fine for forming an undergrowth among shrubbery. 20 cts. each, $\$ 2$ per doz.

## Polypodium

VULGARE. Polypody. A fine evergreen

Fern for rockwork in shade. 15 cts. each, $\$ 1.50$ per doz.

## Woodsia

ILVENSIS. Rusty Woodsia. Grows on dry exposed rocks, forming large tufts, and is a pretty Fern. 5 to 6 inches high. 15 cts. each. $\$ 1.50$ per doz.
OBTUSA. Fronds a little wider than W. Ilvensis. Easily managed. 15 cts. each, $\$ 1.50$ per doz.

## Everyman's Fern Collection

This Collection of Hardy Ferns for $\$ 3.00$, not prepaid.

2 Adiantum pedatum(Maiden-hair)
1 Lady Fern
3 Aspidium marginale
3 Aspidium spinulosum

1 Goldie's Fern (Aspideum
Goldianume)
3 Bladder Ferns
3 Hay Scented Ferns

2 Ostrich Ferns
2 Cinnamon Ferns
2 Christmas Ferns
2 Rusty Woodsias

## TENDER PLANTS

Suited to spring planting. They are lifted in autumn just after frost, and, after being well dried, the bulbs are stored in a warm, dry place. The flowers of nearly all are brilliant and showy.

## Cannas

City of Portland-This is one of the most beautiful pink Cannas. A fine bedding variety; well-filled trusses of large flowers. Green foliage; three feet. 25 cts . each.
Eureka-(Green-leaved)-A free bloomer and its great trusses of perfectly formed creamy white flowers stand nicely above the dense green foliage on stiff, upright stems. 15 cts. each.

King Humbert. King of the Bronze-leaved Cannas. A brilliant orange-scarlet variety of large size; leaves broad and massive. Height 5 feet, 20 cts. each, $\$ 2$ per doz.
President-A gorgeous variety producing immense trusses of bright red flowers in great profusion. 30 cts. each.
Richard Wallace-Color canary-yellow. Large flowers. Four and one-half feet. 15 cts. each.

## Gladioli

This is a very useful class of bulbs for spring planting, from the fact that the flowers are not only among the most showy in their season, but also because, by making a succession of plantings, the season may be prolonged until frost. Some of the later hybrid sorts are exquisitely delicate in their rich tints. They are most effective when massed among plants of similar character. They like a deep rich soil and sheltered position. Plenty of manure should be worked into the soil, but not allowed to come in contact with the bulbs, as it causes decay. August.

America. Delicate lavender-pink flowers of large size, borne on strong stems, and well placed; splendid habit; still very popular as a cut flower variety. 8 cts . each, 85 cts. per doz.

Tritonia Montbretia
Baron Hulot (Blue King). A really fine blue Gladiolus. In color it is a rich, royal violetblue, very effective when cut and used in conjunction with Schwaben or other yellow variety. 10 cts. each. $\$ 1$ per doz.
G1ory. Ruffled-Kunderd. Each flower petal is exquisitely ruffled and fluted. Stalks very robust and produce from eight to twelve massive beautiful flowers, which expand wide open and are delicate creampink with a neat crimson stripe. 20 cts. each, $\$ 2$ per doz.

Halley. The predominating color of these flowers is delicate salmon pink, with a slight roseate tinge, though the lower petals bear a creamy blotch with a stripe of bright red through the center, the whole producing a delightful effect. 10 cts. each, 90 cts. doz.

Mrs. Frank Pendleton-Lem. KunderdThe flowers are very large and well expanded, of a lovely flushed salmon-pink with brilliant carmine, or deep blood-red blotches in the throat, presenting a vivid contrast of orchid-like attractiveness. It is of the Lemoinei type in form and color effect, with a gandavensis stem, so that it takes up water freely and opens up perfectly nearly every flower after being cut and placed in water. 15 cts . each, $\$ 1.50$ per doz.
Niagara. A delightful cream shade, blending to canary yellow, splashed with carmine. 10 cts. each, $\$ 1$ per doz.
Prince of Wales. This is in our estimation one of the best novelties of recent introduction. The flowers are large and well placed and the color is a most charming coral-pink. 20 cts. each, $\$ 2.00$ per doz.
Princeps. Brilliant scarlet-crimson, carrying mostly three white blotches on lower petals. 10 cts. each, $\$ 1$ per doz.
Schwaben. Clear, canary-yellow, shading to soft sulphur. 12 cts. each, $\$ 1.25$ per doz.
Sulphur King. Gand. Childs. This is by all odds the most valuable yellow variety ever introduced. It produces a very long spike of the clearest sulphur-yellow flowers yet seen in any Gladiolus. 20 cts. each, $\$ 2$ per doz.
Fine Mixed, All Shades. Some of the showy kinds, with many of the most delicate colors. 10c. each, 80c. per doz., $\$ 4$ per 100.

## Primulinus Hybrids

In recent years these Hybrids have come to be extremely popular and they deserve every word of praise they get; they are graceful, easy to grow, moderate in price, artistic in colors, which range from sulphur-yellow to chrome-yellow, all shades of orange with now and then a cream and pink among them, but Nasturtium colors predominate; they are the last word in Gladioli for dainty decorations. 8 cts. each; 60 cts. per doz.

## Tritonia, (Montbretia)

Crocosmæflora. One of the most floriferous of summer flowering bulbs. The very pretty orange-scarlet flowers are borne in loose racemes and measure 2 inches across. The foliage is sword shaped and abundant, greatly enhancing the beauty of the flowers. August and September. 10 cts. each, 50 cts. per doz., $\$ 2.50$ per $100, \$ 15$ per M.

Dorothy Perkins Roses (see p. 38)

## ROSES

Roses like a good, deep, rich, loam. There is little danger of getting the soil too rich. Shallow, sandy or gravelly soils are not suited to them. When it is necessary to plant in such soils as these, artificial compost should be made by taking out a foot and a half of this natural soil, and filling in with rich, heavy loam. In cold climates, Roses may be grown by banking up a foot or 18 inches just before winter. In spring this should be removed and the plants cut back as far as they are killed. Even the tender, greenhouse Roses may be grown in this way:

## Group I-Species

ROSA carolina. The well-known wild Rose. 15 cts. each, $\$ 1.50$ per doz.
R. lucida. 15 cts. each, $\$ 1.50$ per doz.
R. rubiginosa. Sweetbriar, or Eglantine. Handsome, single flowers. Both flowers and leaves very fragrant. 2 to 3 feet. 30 cts. each.
R. rugosa. Russian Rose. A very desirable and hardy species, with large, solitary, red, or sometimes white, flowers, coming in long succession. It is not rare
to see ripe fruit and flowers at the same time. Fruit large, orange-red to red; handsome in autumn. 40c ea., $\$ 4 \mathrm{doz}$.
R.-, var. alba is a single white form. 50 c .
R.-, var. Blanc de Coubert. Large, double white. 50 cts. each, $\$ 5$ doz.
R. setigera. Prairie Rose. One of the best single roses; delightful pink; hardy and very charming in mass; height about 6 feet in rich soil. Much used for naturalizing, producing very effective results. 60 cts. each.

## Paul Neyron Rose

R. Wichuriana. Cemetery or Memorial Rose. A Japanese trailing species. Foliage firm and glossy green; a good bloomer. A splendid Rose for growing where it will receive no care. Flowers single, white, and borne in profusion. S1 each.
Mixed Hybrids. These mixed Memorial Roses are very fine. Some are double and some single. 45 cts. each.

## Group II-Horticultural

Following named species at $\$ 1$ each, except where otherwise noted.
Anna de Diesbach. Large, brilliant crimson, fragrant flowers; of good habit and vigor.

Baby Rambler, or Dwarf Crimson Rambler. It is claimed to be perfectly hardy and free from disease. Is constantly in flower from early spring until frost. A first-class bedding plant not over 18 inches high, with goodsized trusses of crimson flowers much like Crimson Rambler. 75 c each.

Crimson Rambler. This vigorous grower attains a height of 10 to 20 feet in favored situations. The flowers are borne in goodsized clusters, of a brilliant crimson color; in fact, a single cluster is a boquet in itself. It has been quite hardy here, seldom killing back, except a little in the most trying winters. 50 cts. each.

Dorothy Perkins. This new climbing Rose has stood Vermont winters and seems quite hardy. I have seldom seen a more desirable climber. The flowers are a beautiful, shell-pink, borne in clusters of ten to twenty each, and over an inch wide. They have a delicious fragrance and are very durable. For arches and pergolas there is no finer Rose among the climbers. 60 cts. each.
White Dorothy Perkins. A counterpart of Dorothy Perkins, except in color, showing a faint trace of pink in bud, opening to a pure white flower. 60 cts . each.
Frau Karl Druschki. This charming new Rose is among the best of the double whites. If it has any fault yet seen, it is that it is too free in blooming. I would suggest thinning out the buds a little that larger blooms might be had, though the flowers are very large and of splendid form.

General Jacqueminot. Fragrant, large, very showy flowers of bright, velvety crimson. An old favorite that should be in every rose-garden.

Killarney. One of the best Roses with fragrant pink flowers. While it is not the hardiest Rose we have it is as sturdy as most of them, and if you bank it up a foot in late fall, you will have plenty of good wood if it should kill back to the ground.
Hugh Dickson. A free, fragrant bloomer with bright crimson-shaded scarlet flowers.
Madame Plantier. This choice, full-double, pure white rose is hardy here, and, though it flowers at one time only, produces its blooms in the greatest profusion. One of the best roses we know of to plant where it has to take care of itself, as in cemetery planting.
Magna Charta. Hardy. Handsome pink flowers in June, on long stems. Exceedingly fragrant.
Margaret Dickson. Soft creamy white. Very large and fine.

Mrs. John Laing. Soft pink; of good form; fragrant and free flowering. One of the finest June Roses.
Paul Neyron. The flowers are very large, clear, deep rose and very double; the largest Rose in cultivation; borne on long stems; very fragrant.
Persian Yeilow. Rather small flowers and foliage; bright yellow, nearly full flowers; very hardy. A fine Rose for growing in the shrubbery border; the bush is very hardy.
Semi-Double Scotch Rose. This old Rose has long been established in some of our Vermont homes. It is very hardy, and produces plenty of good-sized flowers. $\$ 1.25 \mathrm{ea}$.
Ulrich Brunner. Bright cherry-red. Stems long, light green and almost smooth. Free flowering.

## VINES, TRAILERS AND CLIMBERS

Clematis Paniculata

ARISTOLOCHIA macrophylla. Dutchman's Pipe. Fine climber; large, dark green leaves; small, quaint flowers, shaped like a pipe, purple and green. \$1 each.
CELASTRUS scandens. Bittersweet. A handsome, twining shrub, with dark green foliage and handsome orange-colored fruit. For covering old walls or stone heaps. 50 cts. each.
C. orbiculatus. Japan Bittersweet. A vigorous grower bearing a profusion of orange-yellow fruit with crimson seeds. 50 cts. each.
CLEMATIS lanuginosa, var. Jackmanii. Very handsome, large, dark purple flowers. The showiest and handsomest of all the Clematis.
C. Mme. Edouard Andre. Crimson.

Either of the above two in strong, two-year-old plants, 75 cts. each.
C. paniculata. One of the handsomest in cultivation; of strong, climbing habit, often 12 feet high and covered with fragrant white flowers as if with a mantle. A fine species; a native of Japan, and quite hardy. 40 cts. each, $\$ 4$ per doz.
C. virginiana. Virgin's Bower; Old Man's Beard. One of the hardiest, though not so free from blight as C. paniculata. Has quaint, hairy seed-pods. 40 cts. each.
C. Vitalba. Trateler's Joy. A hardy, single, white-flowered sort. 45c. each.
HUMULUS Lupulus. Common Hop Vine. Very useful for covering bowers, or any place where the covering is not necessary for winter. It can be planted to run along shrubbery. Exceedingly fast grower, covering a large trellis in a short time. Heat, drought or insects do not trouble it. Leaves are large and rough. 15 cts . each, $\$ 1.50$ per doz.
H.- var. aureus. Golden Hop Vine. 20 cts. each, $\$ 2$ per doz.
LONICERA flava. Very handsome with its red fruit. 2 ft .15 c . each, $\$ 1.50$ per doz.
L. glauca. 25c. each, $\$ 2.50$ doz.
L. Pericylmenum, var. belgica. Scarlet Honeysuckle. A very fine, red-flowered form; almost shrubby. It is also quite hardy. 55 cts. each.
L. Sullivantii. Bears scarlet berries in the axils of veined leaves. 20 cts each.
LYCIUM chinense. Matrimony Vine. Hardy climber; very handsome when covered with its scarlet fruit in autumn. 45 cts. each.
MENISPERMUM canadense. Moonseed. 25 cts . each.

PSEDERA (Ampelopsis) quinquefolia. Virginia Creeper; American Woodbine. Hardy, a quick grower. Fine for covering trellises or stone walls. Its dark beautiful green foliage turns to a charming dark red in autumn. It likes a rich, peaty soil. 15 cts . each, $\$ 1.50$ per doz. P. (Ampelopsis)-var. Engelmannii. A form which clings to rocks, and may be used where the Boston Ivy would not be hardy. 25 cts. each, $\$ 2.50$ per doz.
P. (Ampelopsis) tricuspidata. (A. Veitchii). Boston Ivy. Clings closely to wood or stonework; colors beautiful in autumn. 25 cts. each, $\$ 2.50$ per doz.
TECOMA radicans (Bignonia radicans). Trumpet Creeper. Orange-scarlet, trumpet-shaped, showy flowers. A tall climber. 25 cts. each.
VINCA minor cærulea. For shady places; fine clumps. 10 cts . each, $\$ 1$ per doz.
Wistaria. Kidney Bean. Form thick, woody stems and climb high. Their spring bloom is produced in rich cascades, and they flower at intervals all summer.
W. chinensis. Flowers large, not odorous, produced in great profusion on established plants. Native of China. Flowers purple. 50 cts. each.
W. chinensis alba. 18 to 24 inches. 50 cts. each.

## EVERGREENS

Erergreens are used for specimens on lawn, also extensively for massing, shelter-belts, screens, hedges, etc. They form perfect backgrounds for the flowering shrubs of early spring, the berries of autumn, and winter's tracery of bright bark and twigs. Other new uses are for filling window boxes, and growing evergreens in tubs for hall and porch plants. Trees dug with ball of earth about the roots and tightly pinned in burlap will stand transportation and transplanting with little risk of loss. We pack them so that the root-fibers are well protected and will reach their destination in good growing condition. If planters will continue this care, keeping the fibers from drying out by exposure to air and sun until the stock is planted, success is reasonably sure. Planting season for fall from August 15 to October 10; for spring, from April 10 to May 15, depending on season and locality. We do not charge for balling in burlap. Boxes over 3 feet in length are charged for at cost.

ABIES concolor. A large tree in its natural habitat growing 100 feet or more in height with trunk 4 to 6 feet in diameter; foliage pale blue or glaucous. Plants, 12 to 18 inches, $\$ 2$ each. 2 to 3 feet high, $\$ 4$ each.
JUNIPERUS virginiana. Red Cedar, or Savin. A handsome pyramidal evergreen 30 to 60 feet high with shreddy bark and heartwood red and aromatic. Plants 2 to 3 feet, $\$ 1.75$ each.

PICEA alba. White Spruce. A tall and handsome tree which attains a heigbt of 50 to 100 feet, somewhat resembling the Balsam in aspect. Plants 2 to 3 feet. $\$ 2$ each.
P. Alcockiana. Alcock's Spruce. From Japan. It forms a beautiful tree of close habit. Foliage pale green, silvery underneath. Valuable. 2 to 3 feet. $\$ 3$ each.

Abies concolor
P. excelsa. (Abies excelsa). Norway Spruce, Largely used in cultivation as a shade tree and now established in several places in Connecticut. Its dark green, glossy foliage makes it a very desirable evergreen. Rather quick in growth, quite hardy, and very ornamental. 3 to 5 feet, $\$ 1.50$ each, $\$ 15$ per doz., 5 to 7 feet, $\$ 2.50$ each.
P. Engelmanni. A pyramidal tree of compact growth and having attractive bluish foliage. Very desirable variety. Plants, 18 to 24 inches, $\$ 2$ each, 3 to 4 ft . $\$ 4$ each.
P. pungens. Colorado Spruce. Not blue. One of the hardiest of the western spruces. 12 to 20 inches, $\$ 1.50$ each.
P.-, var. glauca. This blue form of the Colorado Spruce is a seedling, and seedling trees are often more symmetrical than grafted trees like the Koster's. A very handsome and hardy tree. Plants, 12 to 18 inches high, $\$ 3$ each.
P.-, var. Kosteriana. Koster's Blue Spruce. 18 to 24 inches. $\$ 3.50$ each.

PINUS flexilis. Limber Pine. Tree grows in time to 50 to 80 feet high. Native from Alberta to California and New Mexico. It is a hardy Pine of slow growth, and is especially adapted for ornamental planting on rocky slopes. Plants, 2 to 3 feet, $\$ 2$ each.
P. Laricio, var. austriaca. Austrian Pine. A tall tree with broadly ovate head, dark green, rigid foliage and dark gray bark. It forms a symmetrical pyramid when mature. Plants, 2 to 3 feet high, $\$ 1.50$ each, 3 to 5 feet, $\$ 3$ each.
P. montana, var. Mughus. Mugho Pine. A dwarf tree of the highest value where a low, dense, spreading growth is desired; very dark foliage; extremely hardy. 15to 18 -inch spread, $\$ 2$ each, 24 - to 30 -inch spread, \$4 each.
P. resinosa. Red Pine; Norway Pine. Tree attains a height of 70 to 150 feet, with long, horizontal branches. A fine ornamental tree. Plants, 1 to 2 feet, $\$ 1.25$ each.

TAXUS cuspidata. A pretty Japanese evergreen which has stood our Vermont winters. Plants, 18 to 20 inches high, $\$ 2$ each.

TSUGA canadensis. Comion Hemlock. Fine for hedges, a beautiful boundary tree or in any position you may place it. Plants 2 to 3 feet, $\$ 1.50$ each, $\$ 15$ per doz; 4 to 6 feet, $\$ 3$ each.

Picea Engelmanni

Pinus Mughus
THUYA occidentalis. American Arborvite. This well-known evergreen is entirely hardy in all situations and adapted to all soils. Of rapid growth, attaining a height of 25 to 30 feet, growing in an erect conical form, making a beautiful hedge or specimen plant. 18 to 24 inches, 60 cts. each, $\$ 6$ per doz.; 12 to 18 inches, 50 cts. each, $\$ 5.00$ per doz.

## Tsuga Canadensis

T.-, var. Little Gem. A dwarf form. Very attractive and useful in certain locations. 4-year-old plants, $\$ 2$ each.
T.-, var. Hoveyi. A very desirable, lowgrowing sort; light green. $11 / 2$ to 2 feet, \$1.75 each.
T. Orientalis (Biota). Oriental Arborvitx.
Tom Thumb. Small, compact, with feathery foliage. Makes a beautiful ornament for a small yard or cemetery lot; fine for low hedges. Plants, 8 to 12 inches \$1 each.

## SHRUBS AND TREES

In handling shrubs and trees it is very important that the roots do not become dry. When they are unpacked, if they are not set out permanently at once, they should be heeled in in moist soil or placed where they cannot dry out. We make a practice of dipping the roots of those we send out in a clay mud which keeps the roots from the air. We believe this is very beneficial in preserving their vitality. Where shrubs and trees are over three feet, we charge the cost of box or bale. When we can bale them, the parcel is lighter and express not so much. Bales of over 3 feet cost from 15 to 75 cents, according to size. A few shrubs and trees do not carry well unless boxed.

Trees or shrubs sent with roots done in balls of earth in burlap cost more by express, on account of this extra weight, but are surer to live. We can ball any of the shrubs or small trees for 5 to 10 cts extra, according to size, if customers order them sent this way. All shrubs or trees with ball of earth must be boxed. All are good, healthy nursery grown stock. We furnish certificates of inspection of stock to those who desire them. I am inclined to believe that shrubs and trees of the deciduous class may be transplanted with success much earlier in autumn than is generally supposed. I do not advise transplanting before the growth has ceased, but as soon as all growth is done, and before the leaves fall, I think transplanting can be done, and I do not consider it necessary to remove all the leaves. In fact, I believe that a part of the foliage left on shrubs and trees is beneficial, and will aid them in making a root growth, which would not occur after they are removed. I have had quite as good reports from this class of plants shipped with foliage all on as when sent late, after all leaves have been removed by frost.

ACER Ginnala. Small tree, or large shrub, with handsome foliage, turning scarlet in autumn. Much like the Japanese Maples in general effect. It makes a good, tall shrub to give a touch of color in any border or bed of shrubbery. No better shrub could be found for shutting out unsightly

Acer Platanoides
objects. May be trimmed back, if desired. Plants, 6 to 8 feet, 80 cts. each, $\$ 8$ per doz.; 3 to 5 feet, 60 ts. each, $\$ 6$ per doz.
A. Negundo. Box Maple; Box Elder. A quick grower and makes a good shape tree of good size, with handsome foliage. Plants 8 to 10 feet, $\$ 1$ each.
A. pennsylvanicum. Moosewood; Striped Maple. This is a small and slender tree, with light green striped bark. Winter effect very handsome. Plants, 3 to 5 feet, 45 cts . each.
A. platanoides. Norway Maple. A very ornamental and hardy species; attains a height of 50 feet; rapid in growth; needs good drainage. One of the finest of the maples. 6 to 8 feet. $\$ 1.30$ each; 10 to 12 feet, $\$ 1.50$ each.
A.-, var. Schwedleri. A form with purplish foliage. Plants, 5 to 7 ft ., $\$ 2$ each.
A. pseudoplatanus. Sycamore Maple. Tree 70 feet high, of vigorous growth, with spreading head, native to Europe in the Caucasus Mountains. Plants, 6 to 8 feet, 60 cts. each, $\$ 6$ per doz.
A. saccharinum. White or Silver Maple. This fine, ornamental tree is found growing along river banks, and in moist clay is a rapid grower. It will thrive in more places than the Sugar Maple. 6 to 8 feet, 85 cts. each.

Betula Populifolia
A spicatum. Mountain Maple. 3 to 4 feet, 75 cts. each.
A.-, var. Wieri laciniatum. Wier's Cut-leaved Maple. Ornamental. 6 to 8 feet, $\$ 1.75$ each.
A. saccharum. Sugar Maple. For decorative purposes or shade. 8 to 10 feet, 90c. each; 10 to 12 feet high, $\$ 1$ each.
ÆSCULUS Hippocastanum. Horse Chestnut. 6 to 7 feet, $\$ 1.25$ each.
Æ. rubicunda. Red Horse-Chestnut. 3 to 6 feet high, $\$ 1$ each.
ailanthus glandulosa. Tree of HeavEn. 6 to 8 feet, 70 cts. each.

AMELANCHIER canadensis. Shad Bush. 2 to 3 feet. 50 cts. each.

AMORPHA canescens. Lead Plant. Low shrub, 1 to 3 feet high, densely whitecanescent. Flowers blue, spikes crowded into terminal panicles: 15 cts . each, $\$ 1.50$ per doz.
Amygdalus. Flowering Almond.
Double Rose. A delightful little tree for the lawn. 2 to 3 feet 75 cts. each.
Double White. 75 cts . each.
BERBERIS Thunbergii. This makes a fine plant for low hedges or for the shrub border. The red berries which come so abundantly on mature plants and the handsome scarlet foliage it usually has in the fall make it one of the most attractive shrubs. It is a plant easily established and, if set in fall or spring at the right time, seldom fails. Plants, 12 to 18 inches high, 35 cts. each, $\$ 3.50$ per doz.
B. vulgaris, var. atropurpurea. Purpleleaved form. 2 to 3 feet high, 50 cts. each, $\$ 5$ per doz.
BETULA alba. European White Birch. This tree is a very beautiful one on account of its white bark as well as its dark green foliage. Trees, 8 to 10 feet high, $\$ 1.50$ each.
B. var. Lenta. Cherry, Sweet or Black Birch. Plants, 7 to 9 feet, 80 cts . each.
B. var. pendula laciniata. Cut-leaved Weeping Birch. Makes an effective lawn tree. 6 to 8 ft ., $\$ 2.00$ each.
B.-, populifolia. White, Gray or OldField Birch. Common on poor, sandy, or rocky soil. Plants, 6 to 8 feet, 50 cts. each, $\$ 5$ per doz.
CARAGANA arborescens. Pea Tree. An interesting shrub, with fine dark green, locust-like foliage and yellow, pea-shaped flowers. 5 to 6 feet, 35 cts. each, $\$ 3.50$ per doz.
CASTANEA dentata. American Chestnut. The common chestnut as sold in our markets. Plants, 6 to 8 feet, 60 cts. each.

CEANOTHUS americanus. New Jersey Tea. Grows about 3 feet high, bearing terminal and axillary panicles of pretty white flowers. While it will grow in considerably moist ground, it is found usually growing in rather dry places. Plants 24 inches high, 40 cts. each, $\$ 4$ per doz.
CEPHALANTHUS occidentalis. Button Bush. Native to swamps and along streams. Plants about 2 feet high, 30 cts. each.

CLETHRA alnifolia. Sweet Pepper Bush; White Alder. A shrub 3 to 10 feet high, growing near the coast from Maine to Virginia and southward, bearing an abundance of handsome, fragrant flowers in summer. 2 to 3 feet, 50 cts. each, $\$ 5$ per doz.

## Cornus. Shrubby Dogwoods

The relationship of these dogwoods to the white flowering dogwood is not apparent at the first glance, not only are they shrubs instead of trees, but they do not have the four white petal-like bracts which surround the cluster of true flowers on the flowering dogwood. The flowers are creamy white in flat clusters followed by white, blue or black berries. They prefer partial shade and good soil. They are much used by landscape architects in naturalistic planting.
CORNUS alba, var. sibirica. The bright, coral red branches make this a pretty shrub in winter when the foliage is gone. Plants, about 2 to 3 feet, 35 cts. each, $\$ 3.50$ per doz.
C.-, var. sibirica, variegata. Grows 8 to 10 feet high with purplish red branches and beautiful silver variegated foliage. Plants 2 to 3 feet, 60 cts. each, $\$ 5$ doz.
C.-circinata. Round-LEAVED Dogwood. This is the largest-leaved Dogwood we have, I think. It grows in dry woods and will thrive in drier places than most shrubs. Plants, 2 to 3 feet high, 50 cts. each.
C. Amomum. Silky Cornel. Shrub 3 to 10 feet high, with purple branches and round, dark green leaves. Fruit blue or bluish white. Plants 3 to 4 feet., 35 c ea.
C. sanguinea. Shrub sometimes 12 feet high with purple or dark red branches. Native of Europe. Hlants, 3 to 4 feet high, 35 cts. each.
C. stolonifera. Red Osier. With red bark 3 to 5 feet, branching. 40 cts. each, $\$ 4$ per doz.
C.- , var. aurea. Yellow bark. 55c each.
C. paniculata. Shrub 6 to 15 feet, with gray branches and white flowers. The white fruit and red peduncles are very pretty in the fall and the foliage often turns a pretty color in the autumn. It looks best when planted in a mass. Plants 3 to 5 feet, 35 cts. each, $\$ 3$ per doz.
COTONEASTER horizontalis. About 13 inches high, with small, dark, shiny green leaves. Fine for edging shrubbery. 40 cts. each, $\$ 4$ per doz.

CRAT $\operatorname{eqGUS}$ Oxyacantha. English Hawthorn. A charming bush when in flower or when full of its dark red fruit. Plants 2 to 3 feet, 45 cts. each, $\$ 4$ per doz.
CYDONIA japonica. Japanese Quince. This shrub when in flower makes a good hedge plant or is nice among other shrubbery. Flowers red. Plants, 2 feet high, 40 cts. each.
DEUTZIA gracilis. Shrub which attains a height of three feet and bears an abundance of pure white flowers in June. Plants, 2 feet, 35 c each, $\$ 3.50$ per doz.
D. Lemoinei. $11 / 2$ to 2 feet, with white flowers. This is as hardy here as any of the Deutzias and a handsome, shapely shrub. 45 cts. each.
DIERVILLA amabilis. Pale pink flowers. Plants, 18-24 inches high, 45 cts. each, $\$ 4.50$ per doz.
D. florida (Weigela rosea). A handsome Chinese shrub, with pink-and-white varigated flowers in June. 55 cts. each.
D. trifida. A low shrub with yellow flowers and oblong-ovate leaves. Native from Newfoundland to South Carolina. 20 cts. each, $\$ 2$ per doz.
EVONYMUS atropurpurea. Burning Bush; Wafoo. Tree-like shrub, 6 to 12 feet. Ornamental in autumn because of its abundant crimson fruit drooping on long peduncles. Plants, 2 to 3 feet, 75 cts. each.
FORSYTHIA suspensa. Golden Bell. Shrubs 5 to 8 feet high; branches often drooping and not rarely rooting when they are on the ground; flowers golden yellow, appearing before the leaves. Plants, 3 to 5 feet, 50 cts. each.
F.-, var. Fortunei. This makes a more vigorous growth and has more upright or arching branches than the preceding variety. Plants, 3 to 5 feet, 45 c . each, $\$ 4.50$ per doz.
GENISTA tinctoria. Dyer's Broom; Green Weed. Flowers yellow, in spicate racemes. Plants 2 feet high with round, erect branches, and smooth, lance-shaped leaves. Europe and northwest Asia. 20 cts. each, $\$ 2$ per doz.
Ginkgo biloba. Maidenhair Fern Tree. A tall-growing, hardy tree, with horizontal branches. Has curious, maidenhairlike leaves. Plants, 5 to 6 feet. $\$ 1.25$ each.
halesia carolinianum. Silver Bell Tree; Snowdrop Tree. Handsome, with snowy white flowers. Plants, 2 to 3 feet high, 75 cts. each.

HAMAMELIS virginiana. Witch Hazel. A fine tall shrub which blooms just before winter. Flowers yellowish. Good plants, 2 to 3 feet high, 60 cts. each.
HYDRANGEA arborescens, var. sterilis. Hills-of-Snow. This is a very pretty shrub when in bloom, and the flowers remain fresh a long time. It grows rather slowly, but blooms freely when only 2 feet high. It makes a showy hedge. Plants, 18 to 24 inches high, 80 cts. each, $\$ 8$ doz.
H. paniculata, var. grandiffora. It is a fine decorative plant, either grown as a shrub or trained into tree form, when it sometimes reaches a height of 8 to 10 feet. 2 to 3 feet, 55 cts. each, $\$ 5.50$ per doz.
ILEX verticillata. Winterberry; Black Alder. A pretty shrub, 4 to 5 feet high, bearing brilliant red fruits, which last after the leaves are off, and often nearly all winter. Plants, 18 to 24 inches, 35 cts. each, $\$ 3.50$ per doz.
KALMIA latifolia. Mountain Laurel; Calico Bush. One of the most desirable evergreen shrubs, growing 4 to 8 feet high, bearing in May and June a profusion of large, showy, deep rose or nearly white flowers. Plants 12 to 13 inches in clumps, 85 cts . each, 1 foot, 50 cts .

## Ligustrum. The Privets

The privets all have white flowers in early summer and dark blue berries in winter. They are used mainly for their rapidity of growth, semievergreen foliage and ability to grow in the shade.
LIGUSTRUM ibota. Ibota Privet. A spreading shrub. This and its variety are the handsomest privets in bloom. Hardy in Vermont. Nice for hedges. Plants, 2 feet high, 25 cts. each, $\$ 2.50$ per doz.
L. Ibota Regelianum. Regel's Privet. Low and spreading. Its flowers and berries are very pretty, but its small size and form, ability to grow in the shade and rich green foliage,

Kalmia Latifolia
P. coronarius. Mock Orange: Syringa. Grows from 2 to 10 feet high. A handsomespecies from the south of Europe. Plants, 2 to 3 feet, stocky, 40c each. $\$ 4$ per doz.
P. Lemoinei. Very fragrant, white flowers in short racemes, literally covering the branches. 2 to 3 feet, 50 cts. each, $\$ 5$ doz.
P. pubescens ( $P$.grandiflorus). The flower of this is a little larger than those of $P$. coronarius. 18 to 24 inches, 30 cts. each, $\$ 3$ per doz.
PHYSOCARPUS aureus. Golden Spirea. 3 to 4 feet, 40 cts. each.

Street Planting of Lombardy Poplars
P. opulifolius. Ninebark. A fine, native shrub. 5 to 10 feet high, with umbel-like heads of white flowers in June. Plants, 4 to 5 feet high, 30 cts. each.
Platanus orientalis. Oriental Plane Tree. Grows 50 to 80 feet with usually broad and round head on comparatively short trunk; bark dull grayish or greenish white color. Young plants, 5 to 7 feet, 60 cts. each.
POPULUS nigra italica. Lombardy Poplar. The well-known tall columnar tree useful in so many ways. As a single specimen or in groups of three or four its vertical lines can be used to give an accent in the landscape or to contrast with the horizontal lines of architecture. As a tall screen it is of quick growth and takes up little space. As a street tree it is often used for narrow streets. 7 to 9 feet, 50 cts. each, $\$ 5$ per doz.; 10 to 12 feet, 65 cts. each, $\$ 6.50$ per doz.
PYRUS Aucuparia. European MountainAsh. 6 to 8 feet, $\$ 1.75$ each.
QUERCUS rubra. Red Oak. A large tree, 80 to 100 feet tall, unusually large in leaf, and quick in growth. The young shoots and leaf stems are red, the foliage purplish crimson in autumn. A most beautiful object on the lawn. 6 to 8 ft ., $\$ 1.75$ each.
RHODODENDRON maximum. Rose BAY; Great Laurel. This handsome shrub grows naturally in Vermont and New

Hampshire, but never attains the size here that it does in the south. Flowers pale rose or white, showy; leaves thick, 4 to 8 inches long, deep green. Plants, 2 to 3 feet high, $\$ 1.75$ each; 1 foot $\$ 1$ each.
R. catawbiense. Plants 8 to 10 inches high, 80 cts. each.
R. nudiflorum. Pinxter Flower. A handsome shrub, 2 to 10 feet high. It forms clumps. The flowers are very handsome and vary in color from nearly white to dark purple. $\$ 1$ each, $\$ 10$ doz.
R. punctatum. This has proved quite hardy here and its white or pale pink flowers are very fine. One of the best. Plants, 1 to 2 feet high, $\$ 1.50$ each.
RHUS canadensis ( $R$. aromatica). FraGrant Sumac. A straggling shrub, 3 to 5 feet high. Especially adapted to dry, rocky banks. Plants, 2 to 3 feet, 55 c . each
R. typhina. Staghorn Sumac. The coloring of the foliage in autumn is very fine. Useful to plant in groups about rocky corners, with other shrubbery, or to screen unsightly objects. Good collected plants, $\$ 15$ cts. each, $\$ 1.30$ per dosz.
R.-, var. laciniata. A very attractive form, with finely divided foliage and turning to a handsome orange-red in autumn. 45 cts. each.
ROBINIA hispida. Moss Locust. This is like the locust tree in foliage, and form of the blossoms. The latter are a beautiful shade of pink, and come in late spring
and early summer. It makes a low bush, inclined to sucker and form thickets. Fine for naturalistic and picturesque effects. It sometimes blooms a second time. 35 each, S3.50 per doz.
RUBUS odoratus. Purple - flowering Raspberry. Attains a height of 3 to 5 feet, and bears large, showy flowers in summer. 2 foot collected plants, 15 cts . each, $\$ 1.50$ per doz.
SALIX pentandra (S. laurifolia). Bayleaf; Laurel-leaf Willow. Grows 8 to 20 feet, with shining, lanceolate, dark green leaves. Makes a nice green for any unsightly object. Plants, 2 to 3 feet, 25 cts. each, $\$ 2.50$ per doz.
SAMBUCUS canadensis. Common Elder. Collected plants only, 15 c . ea., $\$ 1.50$ doz. S.-, var. aurea. Golden Elder. Plants, 2 to 3 feet, 55 cts. each.
S. racemosa. Red-Berried Elder. On account of the fine clusters of dark red fruit and dark green foliage, this makes a fine showing among other tall shrubs. The fruit stays on well. Plants, 2 to 3 feet, 35 cts. each, $\$ 3.50$ per doz.
SORBARIA sorbifolia. (Spiræa sorbifolia). Flowers white, in panicles. July and August. Grows 3 to 6 feet high, and is a native of Siberia. Plants, 2 to 3 feet, 55 c .

## Spiraea. The Spiraeas

The Spireas include more popular flowering shrubs than any other group. They are alike in having tiny forget-me-not like flowers, either white or cerise, but the clustering of the flowers is quite different in the different species. They all prefer the sun, and are well adapted to the South. Many put out their foiiage so early in the spring and drop it so late in the fall that they are green several months longer than most deciduous plants.

SPIRÆA arguta. This is one of the finest of hardy shrubs, ranking with Van Houttei and Thunbergii for beauty. Plants, 2 to 3 feet high, 50 cts. each, $\$ 5.00$ per doz.
S. Billiardii. Grows about 6 feet. Flowers bright pink in 5 to 8 -inch panicles. July and August. Plants, 3 to 4 feet, 30c. ea.
S. Bumalda. Shrub about 2 feet high with pinkish flowers in July and August. Plants 2 feet, 55 cts. each.
S. Bumalda, var. Anthony Waterer. A free-flowering and compact shrub with bright crimson flowers. July and August. 50 cts. each $\$ 5$ per doz.
S. Margaritæ. Shrub, 4 to 5 feet. Flowers bright pink in broad corymbs. July and August. 40 cts. each, $\$ 4$ per doz.

Bridal Wreath, Spirea Van Houttei
S. opulifolia. Ninebark. See Physocarpus.
S. prunifolia fl.-pl. A rather good plant with its button-shaped double white flowers. The foliage turns in autumn to a lovely tint of orange. Plants 2 to 3 feet high, 55 cts. each.
S. Thunbergii. One of the handsomest. Branching, with many delicate white flowers and handsome foliage. 2 to 3 feet, 65 cts. each.
S. Van Houttei. Bridal Wreath. A beautiful hardy shrub, with a profusion of white flowers in June. 2 to 3 feet, 45 cts. each, $\$ 4.50$ per doz.
SYMPHORICARPOS orbiculatus. Indian Currant; Coral Berry. Flowers tinged with rose, in short axillary clusters, followed by red berries. 25 cts . each, $\$ 2.50$ per doz.

Viburnum Dentatum
S. racemosus. Snowberry. A pretty shrub, with rose flowers, followed in autumn by handsome snow-white fruit. Quite hardy. Plants 2 to 3 feet high, 45 cts. each, $\$ 4.50$ per doz.
SYRINGA. Lilac.
S. vulgaris. Common Purple Lilac. Plants, 2 feet, 55 cts . each.
S.-, var. alba. Common White Lilac. Plants, 2 to 3 feet, 65 cts. each.
S. japonica. Japan Tree Lilac. Grows to 30 feet, and makes a beautiful lawn specimen. Flowers appear in great profusion during June and July, creamy white in slender plumes 15 to 20 inches long. 2 to 3 feet, 75 cts . each, $\$ 7.50$ per doz.; 3 to 4 feet, 90 cts. each, $\$ 9$ per doz.
S. Josikæa. Late; bluish purple flowers. Plants, 3 to 4 feet, 50 cts. each.

## HYBRID LILAC.

S. Belle de Nancy. Double, satiny pink flowers. Plants 2 to 3 feet, 80 cts . each.
S. Edmond Bossier. Mettalic-violet flowers. 2 to 3 feet, 75 cts . each.
S. Marie Legraye. White flowers. Plants, 2 to 3 feet, 75 cts . each.
S. Maurice de Vilmorin. Double, bluish azure. 4 to 5 feet, $\$ 1.75$ each.
S. Mme. Lemoine. Double white. 4 to 5 feet, $\$ 1.45$ each.
Ulmus americana. White Elm. 6 to 8 feet, 90 cts. each.

## The Viburnums

The wild viburnums, bushy dogwoods, and several other native plants form a group whose blossoms are not quite showy enough for those who are interested only in floral display, but are much used by landscape architects in lawns and parks where they wish to get natural, rather than horticultural effects and yeararound interest, rather than conspicuous display at any one time. Their white flowers, various colored berries and brilliant autumn colors combine to give interest in all seasons, Most of them grow naturally in partial shade. The birds have a particular fondness for many of the viburnum berries. The snow balls are horticultural varieties of viburnums with showy flowers.
VIBURNUM acerifolium. Dockmackie. Attains 5 feet, with upright branches. Flowers yellowish white, in long peduncled cymes, in May and June. Grows pretty well in dry situations under trees. The foliage turns a handsome dark purple in autumn. Fruit a dark berry and quite persistent in autumn. Plants, 3 feet or

Hybrid Lilac
more in good clumps, 65 cts. each.
V. dentatum. Arrow-Wood. 5 to 15 feet high; white flowers, dark purple fruits. The foliage is very good, being a bright, shining green. Plants, 4 feet high, 40 cts. each, $\$ 4$ per doz.
V. Lantana. Wayfaring Tree. This shrub or low tree sometimes attains a height of 20 feet. Flowers in white, dense cymes. Nice for dry places and limestone soil. Plants, 2 to 3 feet high, 65 cts . each
V. Lentago. Sheepberry; Nanny-berry. Shrub or small tree, sometimes 30 feet high. Flowers white in sessile cymes 2 to 5 inches wide. The fruit is oval and bluish black. Blooms in May and June. Foliage often colors a fine purplish red in autumn. Plants, 4 to 5 feet, 45 cts. each. $\$ 4.50$ per doz.
V. Opulus. Cranberry-bush; High Bush Cranberry. Shrub often 12 feet high, with rather smooth, light gray branches. Flowers white in peduncled cymes 3 to 4 inches wide. The handsome, persistent
clusters of red fruit make this a most beautiful bush in autumn. Fruit begins to color at the end of July. Plants, 2 to 3 feet, 45 cts. each, $\$ 4.50$ per doz.
V.-, nanum. A dwarf form. Plants, 8 to 10 inches high, 45 cts. each.
V. tomentosum, var. plicatum. JApanese Snowbali. Has all flowers sterile, forming large globose balls. Plants, 2 to 3 feet, 60 cts. each.
WEIGELA. See Diervilla.

## SMALL FRUITS

## Raspberries

Any soil that will grow good corn is suitable for Raspberries. Cut out the old wood as soon as the crop is harvested if best results are desired. This enables the young canes to get more vigor for the next crop.
St. Regis. Red. Hardy. Extra-strong plants, $\$ 1.15$ per doz.
Cuthbert. Hardy red variety. 80 cts per doz., $\$ 5$ per 100.
Cumberland. Large; black; a healthy, vigorous grower and prolific. The finest of all black Raspberries. $\$ 1.10$ per doz.

## Blackberries

These respond to good treatment and, seeming to prefer sandy soil, will grow and fruit almost everywhere.
Eldorado. Very hardy and very sweet. \$1 per doz.
Snyder. A popular, hardy and prolific sort. It often gives a good picking where others fail. 75 cts. per doz. $\$ 4$ per 100 .

## Vegetable Plants and Roots

ASPARAGUS, Conover's Colossal. 1-year roots, $\$ 1.20$ per 109.
Palmetto. 1 -year roots, $\$ 1.25$ per 100 .
Argenteuil. 1 -year roots, $\$ 1.25$ per 100.
RHUBARB, Victoria. 20 cts . each.

## Lawn Grass

Central Park Choice. A mixture of the best Grass Seeds to form a thick, beavy sward. 30 cts. per lb., $20 \mathrm{lbs}, \$ 5$. About 80 lbs . of Lawn Grass Seed are required for an acre.

## SULPHO-TOBACCO SOAP (Insectide and Fertilizer)

On flowers and plants in windows, flower- and vegetable-gradens, shrubs, small fruits, trees, etc., it is used as a spray for all plant lice and insects. 3-oz. cake (makes $11 / 2$ gallons prepared solution), 12 cts.; 8-oz. cake (makes 4 gallons solution), 22 cts. Easy to use. Dissolves in water and can be applied with atomizer.

## HAZELTINE'S HAND WEEDER

My men like this better than any other weeder we have tried here. It is useful in thinning out. See illustration.

25 cts . each. Postage on each 5 cts . for first two zones, 1c additional for each extra zone.
